Subject: Re: FOR YOUR COMMENTS: ACER PC on List of organised market places - by 13 November
Attachments: Annex_List_Of_OMP revERU 13 11 2014.docx

Dear [REDACTED], dear colleagues,

we are sending on behalf of Energy Regulatory office Czech Republic our responses to the consultation questions.

1. Please provide us with your comments on the draft list of organised market places. Are there any omissions to the list or are there any errors in the list? Please specify your reply.
Answer: Please find corrections directly in the attached file (with given revisions).
2. Virtual trading points (VTPs) are currently not included in the list of organised market places. Do you consider this correct or not? Please justify your reply.
Answer: We consider to not include VTPs in the list of organized market places as correct. We consider energy exchanges, energy broker platforms and PPATs as organized market places and VTP don't comply with the definition for organized market places.
3. For the reasons stated above, the Agency believes that primary auction platforms for transportation contracts do not have to be listed as organised market places. Do you agree with this reasoning? Please justify your reply.
Answer: Yes, we agree that primary auction platforms for transportation contracts do not have to be listed as organised market places. In our opinion primary auction platforms for transportation contracts don't comply with the definition for organised market places (auction platforms are about rights allocation not about energy trading or physical energy delivery).

S pozdravem/ Best Regards
