Subject: Draft List of organised market places - Croatian Energy Market Operator - HROTE

Dear Ms/Mr,

I'm contacting You regarding the Draft List of organised market places. Croatian Energy Market Operator(HROTE) is a Market Operator in Croatia. At the moment electrical energy that is traded in Croatia is traded through bilateral contracts (KISS format) on OTC market and the bilateral contracts that are traded are non-standard. In the draft of the Implementing Acts it is mentioned that on the organised market the trade is conducted through standard contracts.

As HROTE is Market Operator for OTC market in Croatia I would not define us as an Energy Exchange, but as other Organised Market Place, but under REMIT the trade conducted on Organised Market Places is through standard contracts and trade conducted through HROTE is through non-standard contracts.

My question is, under what category, in Your opinion should be HROTE Ltd.?

Thank You and looking forward to Your answer.

Kind regards.
