

COMMENTS ON COMMON SCHEMA FOR THE DISCLOSURE OF INSIDE INFORMATION PUBLIC CONSULTATION PAPER

On May 27 has been published for public consultation a Common Schema for the Disclosure of Inside Information in order to collect the views on the proposed schema.

With regard to the aforementioned public consultation, Viesgo Generación S.L. has the following comment to the paper:

- **General comment to the paper**

In general, we appreciate the proposal for a common standard to ensure proper communication. In case of agreement of standardization, sufficient time must be given for the affected companies to adjust to these new requirements. These adjustments entail additional costs of adaptation in systems and resources.

In our opinion the minimum period of adaptation should be 1 year once the agreement is published.

Madrid, 26th June 2015
