Public consultation on the ENTSO-E proposals for technical specifications for cross-border participation in capacity mechanisms

Fields marked with * are mandatory.

Public Consultation ENTSO-E proposals for technical specifications for cross-border participation in capacity mechanisms

This consultation is addressed to all interested stakeholders.

Stakeholders are invited to fill out this online survey by 9 August 2020, 23:59 hrs (CEST).

For questions, please contact ACER at: ACER-ELE-2020-014@acer.europa.eu

Consultation objective and background

This consultation aims to gather stakeholder views on the proposed technical specifications for cross-border participation in capacity mechanisms.

On 3 July 2020, the European Network of Transmission System Operators for Electricity (ENTSO-E) submitted to ACER their proposals for technical specifications for cross-border participation in capacity mechanisms pursuant to Article 26(11) of Regulation (EU) 2019/943, and consisting of:

- a methodology for calculating the maximum entry capacity for cross-border participation;
- a methodology for sharing the revenues;
- · common rules for the carrying out of availability checks;
- common rules for determining when a non-availability payment is due;
- · terms of operation of the ENTSO-E registry; and
- common rules for identifying capacity eligible to participate in the capacity mechanism.

According to Article 26(11), ACER shall approve these proposals based on the procedure set out in Article 27 of Regulation (EU) 2019/943, amending them where required. In order to inform its assessment and if required, identify areas for amendment, ACER invites all interested third parties to submit their views on the proposals by responding to this online survey during a consultation period of 4 weeks.

Following this consultation, ACER will consider stakeholder feedback and expects to take a decision on the proposals, including potential amendments, within the next three months as required by Article 27 of Regulation (EU) 2019/943, i.e. by 5 October 2020.

Consultation questions	
ACER seeks the opinion of stakeholders with respect to the following elements of the ENTSO-E propo	sal.
Methodology for calculating the maximum entry capacity	
Do you agree with the proposed methodology for calculating the maximum entry capacity for cross-border participation? If not, please explain which elements of the methodology should be changed or otherwise impro	ved.
2. Should the methodology allow for calculating capacity contributions from Member States with no direct netw connection with the Member State applying the capacity mechanism?	ork (

Methodology for sharing the revenues from the allocation of entry capacity

3. Do you agree with	i the proposed methodology for sharing the revenues from allocating entry capacity?	it not,
please explain which	n elements of the methodology should be changed or otherwise improved.	

4. Do you agree with the proposed common rules for the carrying out of availability checks? If not, please explain which elements of the proposed rules should be changed or otherwise improved.
Common rules for determining when a non-availability payment is due
5. Do you agree with the proposed common rules for determining when a non-availability payment is due? If not, please explain which elements of the proposed rules should be changed or otherwise improved.
Terms of the operation of the ENTSO-E registry
6. Do you agree with the proposed terms of the operation of the ENTSO-E registry? If not, please explain which elements of the proposed terms should be changed or otherwise improved.
Common rules for identifying capacity eligible to participate in the capacity mechanism
7. Do you agree with the proposed common rules for identifying capacity eligible to participate in the capacity mechanism? If not, please explain which elements of the proposed rules should be changed or otherwise improved
General provisions and other comments
8. Do you agree with the general provisions of the ENTSO-E proposals (Title 1)? If not, please specify which provisions should be changed or otherwise improved, and explain why.
9. Do you have any other comments on the ENTSO-E proposals that we should take into account in our

Common rules for the carrying out of availability checks

assessment?

We appreciate the cooperative work collaborated of all TSO's within ENTSO-E regarding the proposed methods common rules and terms of operation for cross-border participation in capacity mechanisms. TransnetBW would like to highlight the following points, which are most crucial for the German TSO's to enable a cross-border participation in foreign capacity mechanisms.

For us as TSOs system security is essential. Regarding Article 18 (2) of the ENTSO-E proposal it is crucial for the TSOs that, dependant on where the capacity is located, an availability check does not negatively affect the system security. Furthermore, it is essential that the application of availability checks must not increase the costs for maintaining the same level of system security as without availability checks.

While assessing the ENTSO-E proposal we would like to stress the importance of the Article 3 that addresses how the cost incurred by the implementation of cross-border participation will be covered. The provision of cost coverage is crucial as to successfully implement cross-border participation in European capacity mechanisms – which is the main goal to be achieved by the proposal. Indeed, Article 26 (10) of the EU Regulation 2019/943 addresses tasks (among which examining eligibility and carrying out eligibility checks) to be performed by the TSO where the foreign capacity is located.

For the successful implementation it is necessary for neighbouring TSOs to establish bilateral agreements that regulate the technical implementation of cross-border participation. These agreements should remain technical documents dealing with the exchange of data and possible calculation needed so as to facilitate such negotiations. Both sides must take into account the specifications of the respective country and still find a non-discriminatory solution. While the costs of the CM Operator (TSO) are covered within the national regulatory framework, the TSO where the foreign capacity is located should also have the certainty that non-discrimination is applied as well. Therefore, operational and investment costs arising from the tasks listed at Article 26 (10) of the EU Regulation 2019/943 should be covered. The approach proposed by ENTSO-E regarding cost coverage provides the consensus of all involved TSOs that the cost impact for the TSO where the capacity is located should be neutralized and that these costs are covered, whenever possible, within the national regulatory framework of the CM Operator, and that only the remaining costs are covered within the grid tariffs of the Member State where the capacity is located. Furthermore, the proposal stresses that these costs should be proportional through the cost approval by both National Regulatory Authorities involved.
