14.25 - 14.45	Topic 2: TSOs' Amendment Proposal on mFRRIF technical changes	
	Q&A, discussion	
14.45 - 14.55	Q&A on other topics, discussion	
14.55 - 15.00	Closing	

**Webinar Objective:** ACER presents and discusses the amendments to the implementation frameworks for the European balancing platforms with stakeholders to inform its decision making process.

On 31 March 2022, the EU Agency for the Cooperation of Energy Regulators (ACER) received the proposals submitted by all Transmission System Operators (TSOs) amending the implementation frameworks for the European balancing platforms for the automatic and manual frequency restoration reserve (aFRR, mFRR) and the imbalance netting. The amendment proposals detail the designation of entities performing the relevant functions of these platforms. The proposal on the implementation framework of the mFRR platform also includes technical amendments.

On 16 May 2022, ACER launched a public consultation in order to collect comments from stakeholders. Find out more about the [Public Consultation](#).

In this public workshop, ACER will present the proposal submitted by the TSOs, providing clarifications on the questions of the public consultation, as well as seeking stakeholders' input on the topics of their interest.
