11:30-11:55	<b>Discussion</b> All
11:55-12:00	<b>Wrap-up</b> ACER

**Webinar Objective:** ACER and ENTSO-E are organising a third public workshop to provide an update on the progress and methodologies related to the long-term flow-based allocation process. The workshop is also a chance to discuss the long-term flow-based capacity allocation approach in the Core and Nordic Capacity Calculation Regions.

The workshop on 29th September will be an opportunity to provide an update on the process, actual work on the amendments of allocation methodologies and to address further concrete proposals by stakeholders regarding the long-term capacity auctions

This public workshop will:

- update on the long-term flow-based allocation (LTFBA) process and methodologies;
- address stakeholders' proposals and questions;
- seek further stakeholders' input.
