

Proposals for amendments to the Requirements for Generators

Fields marked with * are mandatory.

Introduction

Important developments in the policies of decarbonisation of the European Union (EU) energy and transport sectors have taken place since the inception of the development of the first European Grid Connection Network Codes (GC NCs) in 2012.

In the framework of the Grid Connection European Stakeholder Committee (GC ESC), the European Commission proposed for ACER to initiate the process towards the amendment of the existing GC NCs in September 2022. The amendment process, as presented to the GC ESC is outlined in the Figure below:

Following the scoping phase, ACER published the Policy Paper on the revision of the network code on requirements for grid connection of generators and the network code on demand connection in September 2022. The Policy Paper aims to transparently indicate to stakeholders the key policy areas in which amendments are to be expected. Moreover, the Paper draws on the alternative policy options and provides recommendations and proposed actions for the amendment process.

[Access the ACER Policy Paper on the revision of the NC RfG and NC DC](#)

This consultation aims at gathering, from all interested stakeholders, concrete proposals for amendments to the Commission Regulation (EU) 2016/631 of 14 April 2016 establishing a **Network Code on Requirements for Grid Connection of Generators** ('NC RfG').

For amendment proposals concerning Network Code on Demand Connection, please go to the form: [NC DC](#).

Responses to this consultation should be submitted by 28 November 2022 23:59 CET.

ACER is highly committed in processing personal data in a lawful way.

Find out more how we process your data: <https://www.acer.europa.eu/the-agency/about-acer/data-protection>

* Name of the stakeholder:

CharIN

* Contact person:

[REDACTED]

* Contact person's email address:

[REDACTED]

* Country of the stakeholder's headquarters or main country of operation:

Germany

* Type of the stakeholder:

- Generator (including association)
- Consumer (including association)
- Transmission system operator (including association)
- Distribution system operator (including association)
- Manufacturers (including association)
- Academia/research institution
- Regulatory authority
- Other (please, elaborate)

Please, elaborate on your answer above, if necessary:

Association

* Do you consent to the publication of the stakeholder's name?

- Yes
- No

* Do you consent to the publication of provided answers?

- Yes
- No (please, note that your answer, without your name and organization, may be shared with the EU institutions and national authorities, drafting team members, and other persons or entities involved in the European Grid Connection Network Codes amendment process)

Instructions

Stakeholders are invited to submit their amendment proposals to the RfG articles that they consider should be revised in a two-step process:

1. by inserting the proposed amendments in the provided Word file
2. by motivating/reasoning the proposed amendments through this online consultation form.

Both steps are mandatory for all amendment proposals.

(Where no amendment is proposed, the article text in the word file can be left unaltered and the cells in the consultation form can be left blank.)

The mandatory steps for submitting amendment proposals are detailed below. At the end of this section, you can find an example showing how to submit your proposals.

Step 1

Please include all your amendment proposals in the **Word file provided below using the Track Changes mode**. Once you edit the file and rename it with your stakeholder's name ("NC_RfG_stakeholder_name"), please upload it in the last section of this form (FILE UPLOAD)

[Download the Word file \(NC RfG\)](#)

Step 2

In addition, please use this form to motivate/reason your proposals, following the instructions:

General requirements for type B power-generating modules

Please write your amendment proposal and the reasoning in the table below.

| | Amendment proposal | Reasoning | Relation to other provisions |
|---------------|--------------------|-----------|------------------------------|
| Article 14(1) | 1 | 2 | 3 |
| Article 14(2) | | | |
| Article 14(3) | | | |
| Article 14(4) | | | |
| Article 14(5) | | | |

Please write your amendment proposal and the reasoning in the table below.

| | Proposal for new provisions in this section | Reasoning | Relation to other provisions |
|---|---------------------------------------------|-----------|------------------------------|
| 4 | New provisions | | |

Please upload your file if necessary

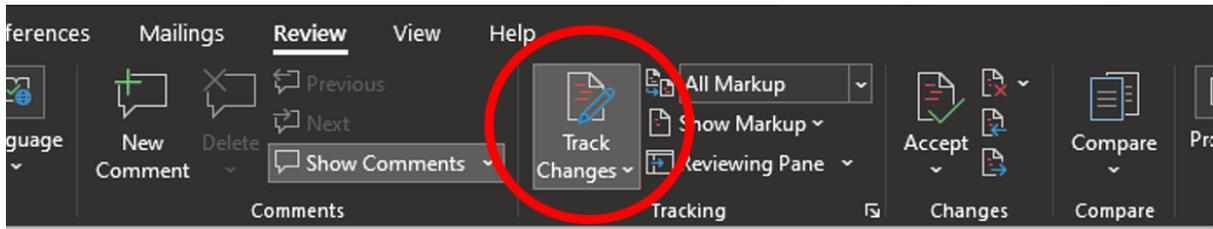

The maximum file size is 1 MB

5 Select file to upload

1. Propose an amended wording of the relevant provision, as you provided in the Word file.
2. Provide the motivation/reasoning behind your proposal.
3. Indicate (if any) which other provisions of the NC RfG are impacted and may need to be amended following your proposal.
4. Provide (if any) your proposals for adding new provisions to the relevant section of the Regulation, as you provided in the Word file.
5. Upload figures or tables if necessary; text inputs should be provided directly in the consultation form.

Example

Stakeholder XYZ would like to propose an amendment to Article 27 of NC RfG. In their view, the meaning of the word "respectively" in this article is not clear. Following a two-step process, the stakeholder downloads the Word file from the **Instruction** section, turns on the Track Changes mode and edits the text (first step).

Article 27

System restoration requirements applicable to AC-connected offshore power park modules

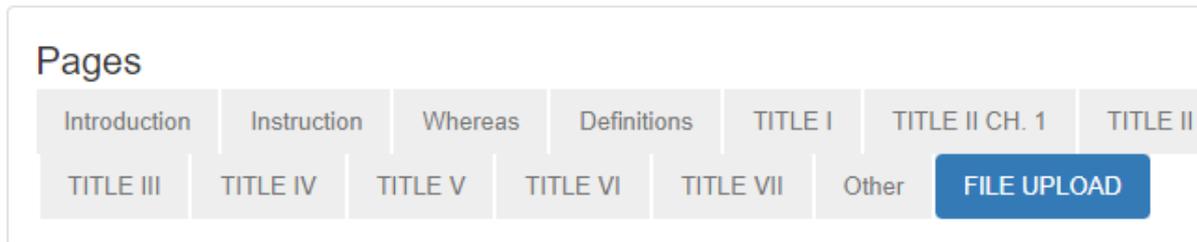

The system restoration requirements laid down respectively in Article 14(4) and Article 15(5) shall apply to AC-connected offshore power park modules types B and C, respectively.

Article 28

General system management requirements applicable to AC-connected offshore power park modules

The general system management requirements laid down in Article 14(5), Article 15(6) and Article 16(4) shall apply to AC-connected offshore power park modules.

After saving the edited file on their device under the name "NC_RfG_Stakeholder_XYZ", the stakeholder uploads it in the **FILE UPLOAD** section.

FILE UPLOAD

Please upload the Word file (downloaded from the *Instruction* section) containing all your amendments.
The maximum file size is 1 MB
🗑️ NC_RfG_Stakeholder_XYZ.docx
Select file to upload

Previous Submit

The stakeholder proceeds to motivate/reason their proposal. As they would like to propose an amendment to Article 27 of NC RfG, they enter **TITLE II CHAPTER 4** Section and insert the proposed amended wording and the reasoning (second step). As the proposed amendment of Article 27 does not affect other provisions, they leave the last column blank.

Pages

| | | | | | | | | |
|--------------|-------------|---------|-------------|-----------|----------------|----------------|----------------|----------------|
| Introduction | Instruction | Whereas | Definitions | TITLE I | TITLE II CH. 1 | TITLE II CH. 2 | TITLE II CH. 3 | TITLE II CH. 4 |
| TITLE III | TITLE IV | TITLE V | TITLE VI | TITLE VII | Other | FILE UPLOAD | | |

TITLE II CHAPTER 4 - Requirements for offshore power park modules

Please write your amendment proposal and the reasoning in the table below.

| | Amendment proposal | Reasoning | Relation to other provisions |
|------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|
| Article 23 | // | // | // |
| Article 24 | // | // | // |
| Article 25 | // | // | // |
| Article 26 | // | // | // |
| Article 27 | The system restoration requirements laid down in Article 14(4) and Article 15(5) shall apply to AC-connected offshore power park modules types B and C, respectively. | The current wording of Article 27 refers to the provisions of Articles 14(4) and 15(5). However, it is unclear from the legal text how the respective application should be understood. Indicating that the requirements of Article 14(4) shall apply to offshore PPMs type B and requirements of Article 15(5) shall apply to offshore PPMs type C follows the internal logic of the NC RfG and corresponds with the capabilities of the units in question. | // |
| Article 28 | // | // | // |

As the survey is long,

1. you have the possibility to edit your answer after submission. When clicking on "submit", you will be given a contribution ID, which you can then use to access your contribution here. This allows you to proceed in steps.
2. we kindly suggest that you download the entire survey as .pdf (link on the right), prepare your answers and then upload them at once in the EU Survey Tool, to avoid a session timeout on submission.

The maximum length of each cell is 5000 characters. This is the maximum technical limit set by the EUsurvey tool, which cannot be increased.

Whereas Section

Please write your amendment proposal and the reasoning in the table below.

Numbers in the first column correspond with the recitals of the NC RfG Whereas section

TITLE II CHAPTER 1 - General Requirements

General requirements for type A power-generating modules

Please write your amendment proposal and the reasoning in the table below.

| | Amendment proposal | Reasoning | Relation to other provisions |
|---------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|------------------------------|
| Article 13(1) | <p>Original text: "General requirements for type A power-generating modules</p> <p>1. Type A power-generating modules shall fulfil the following requirements relating to frequency stability: "</p> <p>-----</p> <p>Proposal, replace it by: "General requirements for type A0 and A, power-generating or storage modules</p> <p>1. Type A0 and A power-generating or storage modules shall fulfil the following requirements relating to frequency stability: "</p> | Add new type A0 requirements | |

| | | | |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| <p>Article 13(2)</p> | <p>Add the following:</p> <p>"8. For Type A0 storage modules, its maximum capacity is defined as the lowest between:</p> <p>a) the AC output power printed in its technical specification (e.g. product label or manual),</p> <p>b) the maximum AC output power limited by password protected software setting (if any).</p> <p>Note: this power may greatly differ from its AC input maximum power.</p> <p>The maximum capacity of the facility is defined as the lowest between:</p> <p>a) the sum of all the generating and storage modules and</p> <p>b) the maximum AC output power limited by a power export limit device or system, e.g. a energy management system"</p> | <p>Take into account special characteristics of storage and bidi modules (different charging and discharging power, software settings for limiting power, etc). Take into account export-limit devices.</p> | |
| <p>Article 13(3)</p> | <p>Add the following:</p> <p>"9. For Type A0 storage modules, the fulfilment of the previous requirements will be limited by its available energy for feed-in (also considering owner preferences)."</p> | <p>Take into account special characteristics of storage and bidi modules.</p> | |

| | | | |
|---------------|--------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Article 13(4) | Add the following: "10. For Type A0 modules, no additional requirements (outside those of RfG NC) may be required" | Forbid additional requirements by national deviations for low power modules (e.g: LFSM-U, P(U), U-Q /Pmax, Reactive power control, LVRT, OVRT, Vector shift, etc) | |
