

ACER workshop on unit investment costs of European energy infrastructure

Thursday, 20 July 2023 | 10.00 - 11.30 CET

Online, MS Teams platform

AGENDA	
09.45 – 10.00	Webinar open for log-in
10.00 - 10.10	Introductory Remarks Jaka Žvab, ACER
10.10 - 11.00	Part I <ul style="list-style-type: none"> • project overview • stakeholders' consultation process • definition of infrastructure categories and assets • data collection – ACER's UNIC application • presentation of the UIC indicators and reference values • lessons learned from the data collection and recommendations • presentation of a UIC calculator model Ivana Sabaka, PwC Ondrej Seban, PwC
11.00 - 10.10	Q&A
11.10 - 11.20	Part II – interactive stakeholder consultation on the practical use of UIC indicators and its reference values Jaka Žvab, ACER
11.20 - 11.30	Q&A
11.30	Closing Remarks Jaka Žvab, ACER

Webinar Objective: In 2023, ACER publishes its second report on Unit Investment Costs (UIC) indicators and corresponding reference values for energy infrastructure projects. The development of UIC indicators by ACER is an obligation set out by Article 11(9) of Regulation (EU) No. 2022/869 set out in Article 11(7).

Aim of this workshop is to inform all interested stakeholders how the process of UIC indicators development has been ongoing and presenting the outcomes of data collection from EU energy infrastructure project promoters. The UIC reference values could be used as a guidance for project

promoters when determining the energy infrastructure costs, as a support to NRAs in making informed Cross Border Cost Allocation decisions etc. In addition to the project data collection, the PwC consultant did a research on the foreseen unit investment costs for new infrastructure categories such as large-scale electrolysers, electric batteries, hydrogen and carbon dioxide pipelines.
