

# ACER draft amendments to the Network Code on Requirements for Generators

Fields marked with \* are mandatory.

## Introduction

This consultation aims to present ACER's draft amendments to the Commission Regulation (EU) 2016/631 of 14 April 2016 establishing a **Network Code on Requirements for Grid Connection of Generators ('NC RfG')**.

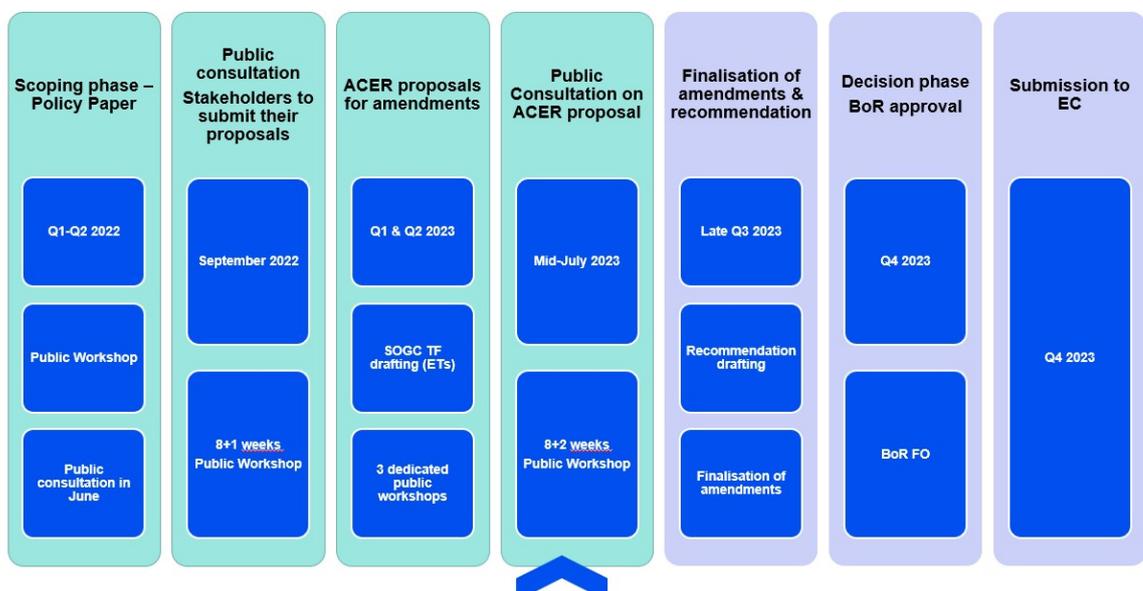

For draft amendments concerning Network Code on Demand Connection ('NC DC'), please go to the respective form: [NC DC](#).

**Responses to this consultation should be submitted by 25 September 2023.**

## Background

Important developments in the policies of decarbonisation of the European Union (EU) energy and transport sectors have taken place since the inception of the development of the first European Grid Connection Network Codes (GC NCs) in 2012.

In the framework of the Grid Connection European Stakeholder Committee (GC ESC), the European Commission proposed for ACER to initiate the process towards the amendment of the existing GC NCs in September 2022. The amendment process, as presented to the GC ESC is outlined in the Figure below:

Following the scoping phase, ACER published the Policy Paper on the revision of the network code on requirements for grid connection of generators and the network code on demand connection in September 2022. The Policy Paper aimed to transparently indicate to stakeholders the key policy areas in which amendments were to be expected.

[Access the ACER Policy Paper on the revision of the NC RfG and NC DC.](#)

As a next step, ACER launched the Public Consultation to gather stakeholders' views and concrete amendment proposals regarding the GC NCs. The stakeholders could submit their inputs by 21 November 2022.

[Access the results of the Public Consultation on the amendments to the grid connection network codes.](#)

Additionally, in the preparation of the draft amendment proposals, ACER organised three dedicated public workshops, namely:

- [electromobility, power-to-gas demand units and heat-pumps](#) (held on 17 April 2023);
- [rate of change of frequency and grid forming capabilities](#) (held on 10 May 2023); and
- [electricity storage](#) (held on 11 May 2023).

After the evaluation of stakeholders' inputs, ACER has formulated its own proposal for the amendments of the GC NCs which is subject to this public consultation.

---

## Stakeholder's details

---

ACER is highly committed in processing personal data in a lawful way.

Find out more how we process your data: <https://www.acer.europa.eu/the-agency/about-acer/data-protection>

\* Name of the stakeholder:

RENAULT

\* Contact person:

[REDACTED]

\* Contact person's email address:

[REDACTED]

\* Country of the stakeholder's headquarters or main country of operation:

France

---

\* Type of the stakeholder:

- Generator (including association)
- Consumer (including association)
- Transmission system operator (including association)
- Distribution system operator (including association)
- Manufacturers (including association)
- Academia/research institution
- Regulatory authority
- Other (please, elaborate)

Please, elaborate on your answer above, if necessary:

OEM

\* Do you consent to the publication of the stakeholder's name?

- Yes
- No

\* Do you consent to the publication of provided answers?

- Yes
- No (please, note that your answer, without your name and organization, may be shared with the EU institutions and national authorities)

---

## Instructions

---

Stakeholders are invited to submit their comments to the NC RfG articles amended by ACER in three mandatory steps:

1. by downloading the ACER draft amendments in the Word file provided below. The file can also be accessed on the right panel of the consultation form under the Background Documents;
2. by commenting on the ACER's draft amendments through this online consultation form and adding their alternative text proposals to the table, if any; and
3. by uploading the alternative amendment proposals to the **entire NC RfG** using the Track Changes mode in the ACER draft amendments file downloaded from **Step 1**.

Where the stakeholder does not have any comments regarding the amendments, the relevant cells in the consultation form can be left blank.

The mandatory steps for submitting the comments are listed below.

---

### ***Step 1***

Please see ACER's draft amendments in the Word file provided below. The file can also be accessed on the right panel of the consultation form under the Background Documents.

## [Download ACER draft amendments to the NC RfG here](#)

---

### *Step 2*

**Kindly note that this consultation form follows the structure of the NC RfG amended legal text provided by ACER in Step 1.**

The paragraph numbering in the form reflects paragraph numbers in the amended legal text. Nevertheless, stakeholders can comment on the deleted paragraphs/articles/titles, which are marked as [deleted]. New articles and titles are marked as [new].

Please use this form to comment on ACER draft amendments and/or to provide an alternative text proposal. The instructions are the following:

Please write your comments on the ACER draft amendments and your alternative text proposals, if any, in the table below.

Includes new articles

	Comment on the ACER draft amendments	Alternative text amendment proposal (if applicable)
Article 1	1	2
Article 3		
Article 4		
Article 4a [new]		
Article 5		
Article 6		
Article 7		
Article 8		
Article 9		
Article 10		
Article 11		
Article 12		

Please write your amendment proposals, if any, in the table below.

	Text amendment proposal (if applicable)
New article	3

Please upload figures or tables if necessary

The maximum file size is 1 MB

Select file to upload 4

1. Leave comments on the ACER draft amendment proposals.
  2. Propose (if any) alternative wording of the relevant provision, as you provided in the Word file.
  3. Provide (if any) your proposals for adding new provisions to the relevant section of the NC RfG, as you provided in the Word file.
  4. Upload figures or tables if necessary; text inputs should be provided directly in the consultation form.
- 

### ***Step 3***

Where the stakeholder would like to propose an alternative amendment to the **entire NC RfG**, please upload the Word file (**downloaded from Step 1**) containing all your alternative amendment proposals in the Track Changes mode to the next **FILE UPLOAD** section and rename it with your stakeholder's name ("ACER\_draft\_RfG\_stakeholder\_name"). You can also upload your justification documents, where applicable.

**In case the file size exceeds the 1MB limit**, which is a consultation tool limit, kindly send the document to the functional mailbox shown on the right panel of the consultation form. Please rename the file with your stakeholder's name as indicated above and send it with the subject "ACER draft RfG legal text [stakeholder name]". Note that only submissions sent within the consultation deadline will be considered.

To facilitate the process, please, make sure that the **alternative text proposals provided in this consultation form are consistent**, to the extent possible, **with those in the Word file** you are uploading, taking into account the character limitations of each cell (max 5000 characters).

## **FILE UPLOAD**

---

Please upload your file here

The maximum file size is 1 MB

Only files of the type pdf,doc,docx,odt,txt,rtf are allowed

**Kindly note that in case the file size exceeds 1MB, the file can be sent to the functional mailbox shown on the right panel of the consultation form under Contact. Please ensure that the file name and email subject are consistent with the instructions in Step 3.**

Please also upload any other document (i.e. **justifications**) below, if relevant.

Please upload your file

The maximum file size is 1 MB

Please upload your file

The maximum file size is 1 MB

Please upload your file

The maximum file size is 1 MB

---

Due to the significant length of this survey:

- you have the possibility to edit your answer after submission. When clicking on "Submit" button, you will be given a Contribution ID which you can then use to access your answers and edit them, if necessary.
- we kindly suggest that you download the entire survey as .pdf (link on the right), prepare your answers and then upload them at once in the EU Survey Tool, to avoid a session timeout on submission.

The maximum length of each cell is 5000 characters. This is the maximum technical limit set by the EUsurvey tool, which cannot be increased.

## Whereas Section

---

Please write your comments on the ACER draft amendments and your alternative text proposals, if any, in the table below

Numbers in the first column correspond to the recitals of the amended version of NC RfG Whereas section, including new recitals

**[NEW] General requirements for type EV1 and EV2 V2G electric vehicles and associated V2G electric vehicle supply equipment**

Please write your comments on the ACER draft amendments and your alternative text proposals, if any, in the table below

	Comment on the ACER draft amendments	Alternative text amendment proposal (if applicable)
Article 13a(1)	We are considering adding "new" before type EV1 - type EV2 to be aligned with the article 30a.	<p>General requirements for new type EV1 and EV2 V2G electric vehicles and associated V2G electric vehicle supply equipment</p> <p>----- -----</p> <p>Add "new" before every occurrence of "type EV1 and EV2"</p>
Article 13a(2)	<p>We consider that this requirement (i.e cyber protected data exchange interface) is not relevant to EV1 which is under sized and not economically viable for active power regulation. We can consider deploying only an ON/OFF i.e logic port - functionality for EV1.</p> <p>For EV2, we consider that the data exchange interface should be developed under the requirements of the existing and coming international standards and regulations (e.g. IEC 63110).</p> <p>We are considering adding "new" before type EV1 - type EV2 to be aligned with the article 30a.</p>	<p>2. A new type EV2 V2G electric vehicle supply equipment shall be equipped with a cyber-protected data exchange interface, consistent with existing standards and regulations, in order to modulate, without undue delay, active power output and input following an instruction being received at the input port. The relevant system operator shall have the right to specify requirements for equipment to make this facility operable remotely.</p>

<p>Article 13a(3)</p>	<p>We consider that the minimum observation time for the EV connection to the electric vehicle supply equipment is not needed. Indeed, if the electric vehicle supply equipment is connected to the grid, it means that the required technical conditions for the EV connection are satisfied.</p> <p>Our concern is to avoid any additional delay for the customer between the EV-EVSE connection and the charging process.</p> <p>So we propose that this 5s observation time only apply when we connect the EVSE to the grid (1st installation or restart) not when connecting the EV to the EVSE to start a charging session</p> <p>We are considering adding "new" before type EV1 - type EV2 to be aligned with the article 30a.</p>	<p>3. A new type EV1 and EV2 V2G electric vehicles and associated V2G electric vehicle supply equipment may autonomously connect to the network under the following conditions:  (a) Frequency range <math>49.8 \text{ Hz} \leq f \leq 50.2 \text{ Hz}</math>;  (b) Minimum observation time: 5 s .</p>
<p>Article 13a(4)</p>	<p>We are considering adding "new" before type EV1 - type EV2 to be aligned with the article 30a.</p>	<p>Add "new" before every occurrence of "type EV1 and EV2"</p>

<p>Article 13a(5)</p>	<p>COMMENT FOR ALL THE ARTICLE We are considering adding "new" before type EV1 - type EV2 to be aligned with the article 30a.</p> <p>COMMENT FOR PARAGRAPH 5(a) We consider that this requirement is not relevant to EV1 which is under sized and not economically viable for active power regulation.</p> <p>COMMENT FOR PARAGRAPH 5(d) We consider that this requirement is not relevant to EV1 which is under sized and not economically viable for active power regulation.</p> <p>COMMENT FOR PARAGRAPH 5(e) We consider that the 1 pu of Pmax is not clearly defined and the requirement is not understandable.</p> <p>In addition, the requirement is not symmetrical if we compare LFSM-U (0.5 s for 1 pu of P max) and LFSM-O (2 s for 50 % of P max)</p> <p>FIGURE YY The S[%] = 1 should be modified to S[%]=5 in order to be coherent with the text.</p>	<p>Replace "A type EV1 and EV2" =&gt; "A new type EV2"</p>
-----------------------	--	--

Article 13a(6)	<p>We are considering adding "new" before type EV1 - type EV2 to be aligned with the article 30a.</p> <p>Also, We consider that this requirement is not relevant to EV1 which is under sized and not economically viable for active power regulation.</p> <p>The requirement is not symmetrical if we compare LFSM-U (0.5 s for 1 pu of P max) and LFSM-O (2 s for 50 % of P max).</p> <p>We should also consider to add the same requirement on switching : Switching from consumption to generation and vice versa should be as fast as technically feasible</p>	Replace "A type EV1 and EV2" => "A new type EV2"
Article 13a(7)	We are considering adding "new" before type EV1 - type EV2 to be aligned with the article 30a.	Add "new" before every occurrence of "type EV1 and EV2"
Article 13a(8)	We are considering adding "new" before type EV1 - type EV2 to be aligned with the article 30a.	Add "new" before every occurrence of "type EV1 and EV2"
Article 13a(9)	We are considering adding "new" before type EV1 - type EV2 to be aligned with the article 30a.	Add "new" before every occurrence of "type EV1 and EV2"
Article 13a(10)	We are considering adding "new" before type EV1 - type EV2 to be aligned with the article 30a.	Add "new" before every occurrence of "type EV1 and EV2"
Article 13a(11)	We are considering adding "new" before type EV1 - type EV2 to be aligned with the article 30a.	Add "new" before every occurrence of "type EV1 and EV2"
