Public consultation on the Capacity Allocation Mechanisms Network Code: achievements and the way forward

Fields marked with * are mandatory.

A Introduction

With gas markets being impacted by a global pandemic (2020) and a European energy crisis (2022), the resilience of the current market rules (also known as "network codes") has been tested. Although they have ensured a proper market functioning (see ACER's Market Monitoring Reports and Congestions Reports), lessons have yet to be learnt to further enhance market resilience.

The European gas market must also be ready to align with the latest policy and technological developments, guaranteeing the Green Deal's decarbonisation targets can be met.

Against this background, the latest European Gas Regulatory Forum has emphasised the importance of having gas market rules which can adequately reflect this evolution, and therefore prompted for the revision of the capacity allocation mechanisms network code (CAM NC).

As part of ACER's review of the Network Code for Capacity Allocation Mechanisms ('CAM NC'), ACER is assessing the achievements of CAM NC and scoping the areas of improvement.

ACER invites stakeholders to actively participate in its review by providing feedback on the scoping of the areas of improvement as well as making reasoned proposals on further areas of improvements that could be considered for eventually amending the CAM NC.

The ACER CAM NC scoping document ('scoping document') contains ACER's review of the marketrules regulating gas transmission capacity allocation in Europe and proposes a scoping of areas ofimprovements based on ACER's work on CAM. It serves as the main consultation document to which thequestionsinthissurveyrefer.

Please send your response to the questions by 5 January 2024, 12:00 noon (CET).We invite stakeholders to bring forward concrete and succinct reasonings. Overly lengthy responses mayn o tb ep r o c e s s e d.The survey was corrected on 17 November for missing questions.

The stakeholder responses will be published on the Agency's website. If you include commercially sensitive information in your reply, please mark the parts of your answer that are confidential as well as provide a non-confidential version for publication purposes.

C Consultation documents

Download ACER's Scoping document

Download the cover note to the scoping document

The following questions are organised per chapter and article of the CAM NC, first depicting ACER's review included in the scoping document, a question on how you assess the need for a change in the article, and a question inviting you to elaborate your answer with specific elements.

D CAM NC Preamble

<u>ACER Special Report on addressing</u> <u>congestion in North-West European</u>	 To maximise technical capacity as well as (buildled) firm capacity (cf. p.15-17) 	yes
<u>gas markets</u>	• A further strengthening of coordination between neighbouring system operators and regulatory authorities is needed, for instance, by harmonising calculation methodologies (cf. p. 16)	
N/A	 Clear recital or New article on CAM principles The core principles of capacity allocation mechanism must be explicitly defined in the NC. Allocation capacity mechanisms must guarantee the well-functioning of the internal market (GTM, guarantee the gas flows, not bottlenecks, bundled offer, cascading principle, market-based allocation, etc.). 	yes

8 Do you agree with ACER's review of the CAM NC Preamble and the identified area(s) of improvement (yes=amendment identified, maybe= amendment may improve market, no=no change envisioned)?

An amendment may further improve the market functioning and better capacity allocation

- Strongly agree
- Agree
- Neutral
- Oisagree
- Strongly disagree

* 9 Please elaborate on why do you agree or disagree with ACER's review, being specific about which elements you agree or disagree with? Are there further improvements that you consider relevant in this area in addition to the ones raised by ACER in the scoping document; please explain your reasoning?

BBL Company is a merchant TSO with its own commercial framework and business model. This is not necessarily 100% aligned with our NNO (NatGas UK) but this is functioning okay

ACER	CAM I Article 2 – Sco	
Policy paper reference	Nature of proposal in the policy paper	Area of improvement
N/A	 "When implicit allocation methods are applied, NRAs may decide not to apply article 8 to 37." (Article 5(2) of CAM NC) Make sure mechanisms of implicit allocation (IA) are consistent with the key principles of the CAM NC, in particular the principle of capacity bundling. To avoid distortions in the functioning of the Internal Market, CNMC considers that all capacity allocation mechanisms must respect the core principles of CAM. Consequently, the CAM NC should be revised article by article (in particular, art.8 to art.37) to analyse the consequences of not applying those articles when implicit allocation is in place. Coordination when deciding and bundling as two key principles also for IA 	yes

* 12 Do you agree with ACER's review of this CAM NC article and the identified area(s) of improvement (yes=amendment identified, maybe= amendment may improve market, no=no change envisioned)?

An amendment may further improve the market functioning and better capacity allocation

- Strongly agree
- Agree

* 13 Please elaborate on why do you agree or disagree with ACER's review, being specific about which elements you agree or disagree with? Are there further improvements that you consider relevant in this area in addition to the ones raised by ACER in the scoping document; please explain your reasoning?

BBLC as a merchant Interconnector between TTF and Bacton UK applies a very well used and by shippers appreciated Implicit Allocation Mechanism which offers unbundled capacity. This unbundled capacity is matched by NatGas UK during regular CAM auctions. It is certainly not perceived by shippers as a risk that they buy an unbundled product, rather the contrary since shippers are willing to biy the capacity much more up front in time and thereby unstress future market situations with regards to imbalnes in supply and demand.

Are there further improvements that you consider relevant in this area in addition to the ones raised by ACER in the scoping document; please explain your reasoning?

BBLC does not feel the need to increase the number of CAM auctions- since BBLC already offers flexible capacity buying options via a well functioning implicit alloaction model.

Besides this we do not understand why the pricing mechanism should change as suggested from ACA to UPA.

Policy paper reference	Nature of proposal in the policy paper	Area of improvement
FUNC 01/2020 "Greater flexibility to book firm capacity at IPs" - Issue Solution and Issue Solutions Supporting Note	 Additional booking opportunities Any Q firm capacity available after ACAs will be auctioned in subsequent UPAs; Proposed regularity: weekly, on Thursdays (subject to change according to flexibility proposal) Once proposed via UPA, a product can no longer be proposed via ACA again (ACER and ENTSOG have diverging views on the implementation) (cf. Are there further improvements that you consider relevant in this area in addition to the ones raised by ACER in the scoping document; please explain your reasoning?

BBLC has an implicit allocation model under which capacity is offered unbundled. On the other hand BBLC and NatGas UK already jointly maximise their respective available capacity in line with CAM rules.

Policy paper reference	Nature of proposal in the policy paper	Area of improvement
ACER Opinion 06/2018 on the template for the main terms and conditions covering contractual provisions which are not affected by fundamental differences in principles of national law or jurisprudence, for the offer of bundled capacity products	 update of ENTSOG's "catalogue of the main terms and conditions in the transport contract(s) of the transmission system operators for bundled capacity products." (p. 2) "The Agency is of the view that the Template does not always go as far as would be desirable. In particular, the Agency recommends that the template is enhanced by providing its content in a form ready to be used in contracts across the Union and by elaborating best practices." (p. 19) "Moreover, the Agency draws ENTSOG's attention on the observations formulated in the recitals of this Opinion." (p. 19) 	yes
N/A	Ensure minimum alignment of Terms and Conditions for dealing with cancellations of bundled capacity	

* 50 Do you agree with ACER's review of this CAM NC article and the identified area(s) of improvement (yes=amendment identified, maybe= amendment may improve market, no=no change envisioned)?

An amendment may further improve the market functioning and better capacity allocation

BBLC has its own General Terms and Conditions which are exlusively applicable to its shippers

Policy paper reference	Nature of proposal in the policy paper	Area of improvement
ACER's comments on the Capacity Conversion Model created by ENTSOG pursuant to Article 21(3) of the NC CAM	 "ENTSOG <u>does not</u> provide for a harmonized conversion model. According to Article 21(3), NC CAM foresees that ENTSOG provides for a harmonized conversion model. The NC does not aim for the application of all potentially existing "conversion methods", which are designed individually by each TSO. The NC foresees that ENTSOG will coordinate across TSOs and propose a model that fits with the general principles of the NC CAM to offer "transparent and efficient allocation of capacity." (p. 3) "The Agency recommends that the same conversion model applies at least per entry-exit zone border, should several Interconnection Points connect the respective entry-exit zones." (p. 3) 	maybe

* Hydrogen and decarbonised gas markets package might clarify it already

Are there further improvements that you consider relevant in this area in addition to the ones raised by ACER in the scoping document; please explain your reasoning?

The suggested reasons for deleting this article are redundant. It is helpful for both TSO's as well as the market to have a described process in place to ask market participants for potential incremental capacity interest which is working properly.

* 75 Please elaborate on why do you agree or disagree with ACER's review, being specific about which elements you agree or disagree with? Are there further improvements that you consider relevant in this area in addition to the ones raised by ACER in the scoping document; please explain your reasoning?

The Prisma allocation procedures seek to align firm and interruptible capacity allocation anyway. TSO's should align firm capacities which is already common procedure. Interruptible capacites will also get alignment based on the firm capacity alignment which is taken place first. Changing allocation mechanisms do not change the nature of capacity products.

92 Do you have any other comments or suggestions?

Interconnectors are not captive TSO's but have its business model based on a merchant market. No sales mean no revenues without an option to correct this. The current applicable regulatory framework which includes a model of Implicit Allocation is working well for BBLC.

ACER should take note that proposed changes to the CAM code including changes to the IA article should not undermine BBLC's commercial business model, while such changes might not directly impact other TSO's since they are tariff or revenue regulated.
