10:45 - 10:55	Q&A	
10:55 - 11:00	Closing remarks Bart VEREECKE, ACER	

Webinar objective

With this webinar, ACER will present the main conclusions of its second Monitoring Report on European liquified natural gas (LNG) market developments, [published on 22 May 2025](#).

This edition focuses on how LNG contracting is evolving in the context of EU's decarbonisation goals under assumptions of the [Fit for 55 package](#) and the [REPowerEU Plan](#).

The report outlines the latest dynamics in the global LNG market, provides insights into recent trade developments and contractual arrangements, and assesses the current and future role of EU LNG terminals.

During the webinar, ACER will:

- present the main findings of its report;
- highlight recent developments in the global LNG market;
- discuss the EU's reliance on the spot LNG market;
- host a panel discussion with selected expert speakers; and
- address stakeholders' questions.
