11:05 - 11:25	Q&A	
11:25 - 11:30	Closing remarks and next steps Karina KNAUS, ACER	

Webinar objective

Following the revision of REMIT ([2024](#)) and of its secondary legislation ([2026](#)), new data reporting requirements will be introduced in three phases between October 2027 and July 2028. To help market participants meet their new obligations, ACER is updating its guidance in three sets, one per phase.

The webinar will present the [first set of ACER's guidance](#), covering exposure and continuous reporting, as well as periodic reporting for contracts with energy intensive consumers. It is an opportunity for market participants and other reporting parties to understand first-phase requirements (applicable from October 2027).

During the webinar, ACER will:

- present key aspects of the new guidance and practical implications of the new requirements;
- introduce the new exposure reporting guidance, explaining its scope and main requirements;
- outline next steps for implementation; and
- address stakeholders' questions.

Pre-reading material

Participants are encouraged to read the following before the webinar:

- First set of REMIT data reporting guidance ([October 2026](#))
- Updated REMIT secondary legislation ([April 2026](#))

Any questions?

ACER is collecting questions ahead of the webinar to address key stakeholder concerns. The most common topics will be addressed in an aggregated and anonymised way during the webinar's Q&A session, alongside live questions.

[Submit your questions](#) by Monday 16 November 2026.

For technical queries or specific reporting situations, please use the [REMIT Query Form](#), as these will not be covered during the webinar.
