(1) This document sets out the methodology for the harmonised maximum and minimum clearing prices (‘HMMCP’) for single intraday coupling (‘SIDC’) in accordance with Article 54(1) of the CACM Regulation. This document also includes a mechanism for adjusting automatically both the maximum and the minimum clearing prices.

(2) The present document covers both the continuous trading and the intraday auctions segments of the HMMCP for SIDC, applies to the continuous trading and to the Intraday Auctions (IDA), that are defined by expected to be established according to the Algorithm methodology.

(3) In accordance with Article 54(1) of the CACM Regulation, the HMMCP for SIDC shall take into account an estimation of the value of lost load (‘VoLL’). The objective of this requirement is to ensure that the HMMCP for SIDC does not impose barriers on free price formation. This document sets the initial value of HMMCP for SIDC, which, in combination with the amendment adjustment rule of HMMCP for SIDC, is expected to achieve the same goal, i.e. to minimise the likelihood that the HMMCP for SIDC impose barriers on free price formation. The HMMCP for SIDC therefore implicitly takes into account the VoLL. Furthermore, since, an amendment adjustment rule ensures that the HMMCP for SIDC is always higher or equal to the HMMCP for single day-ahead coupling (‘SDAC’), whereas the latter is expected to gradually increase to a level, which represents the VoLL as determined by the market participants’ willingness to pay.

(4) This document takes into account the context leading to the increase of the harmonised maximum price in SDAC performed on the 10th May 2022 and also the outcomes of the public consultation on HMMCP for SDAC and SIDC that all NEMOs organized from 24th May to 15th July 2022 and the outcome of the public consultation on HMMCP for SDAC and SIDC organized by ACER from 19 September to 9 October 2022. Based on responses received from stakeholders in the consultation, a triggering mechanism for adjusting the maximum and minimum price limits of the SIDC is introduced. This triggering mechanism, only applying to the intraday auctions can lead to adjustments of the maximum and minimum clearing price limits.

(5) The adjustment rule for the harmonised maximum and minimum clearing prices for SIDC includes a transition period over which the clearing price is still maintained at the value of the harmonised maximum or minimum clearing price for SIDC before the adjustment. During this transition period, and depending on whether the transition period was initiated following an increase of the maximum clearing price or a decrease of the minimum clearing price no further change of that maximum or minimum clearing prices should be initiated.
(1)(6) The HMMCP for SIDC take into account the general objectives of capacity allocation and congestion management cooperation described in Article 3 of the CACM Regulation.

(2)(7) This document fulfils the objective of ‘promoting effective competition in the generation, trading and supply of electricity’ as the HMMCP for SIDC have been set at levels that do not restrict effective competition in the generation, consumption, trading or supply in the organised wholesale market.

(3)(8) This document fulfils the objective of ‘ensuring operational security’ by harmonising HMMCP for SIDC as well as removing barriers for free price formation. This promotes flexibility and thereby contributes to the operational security, as well as security of supply.

(4)(9) This document fulfils the objective of ‘optimising the calculation and allocation of cross-zonal capacity’, and in parts also the objective of ‘optimal use of the transmission infrastructure’, by removing the barriers for free price formation which effectively optimises the allocation of cross-zonal capacities and the use of transmission infrastructure.

(5)(10) This document fulfils, or rather is deemed to have no negative impact on, the objective of "ensuring fair and non-discriminatory treatment of TSOs, NEMOs, the Agency, regulatory authorities and market participants’.

(6)(11) This document achieves the objective of ’ensuring and enhancing the transparency and reliability of information’ as the HMMCP for SIDC have been publicly consulted both by all NEMOs as well as by the Agency. The final document will also be published.

(7)(12) This document fulfils the objective of ‘contributing to the efficient long-term operation and development of the electricity transmission system and electricity sector in the Union’ as the HMMCP for SIDC have been set at levels that allow full provision of supply and demand orders in to the SIDC markets and therefore SIDC results can contribute to provision of efficient price signals for forward (long term) price formation that can enable efficient signals for investment in generation and demand-side response.

Union’ as the HMMCP for SIDC have been set at levels that allow full provision of supply and demand orders into the SIDC markets and therefore SIDC results can contribute to provision of efficient price signals for forward (long-term) price formation that can enable efficient signals for investment in generation and demand-side response.

This document fulfils the objectives of ‘respecting the need for a fair and orderly market and fair and orderly price formation’ and ‘providing non-discriminatory access to cross-zonal capacity’ by harmonising the HMMCP across the bidding zones which participate in SIDC and among all NEMOs active within the given bidding zones.

This document fulfils the objective of ‘creating a level playing field for NEMOs’ as the limits applied will always be identical for multiple NEMOs active within one individual bidding zone as well as single NEMOs active in more bidding zones.

TITLE 1

GENERAL PROVISIONS

Article 1: Subject matter and scope

1. This HMMCP for SIDC and this methodology and the HMMCP shall be applied in all bidding zones which participate in SIDC in accordance with Article 54(1) of the CACM Regulation.

2. This HMMCP for SIDC methodology and the present methodology shall apply to the NEMOs listed in Annex 1.

Article 2: Definitions and interpretation

2. In addition, in this document the following terms shall apply:
   a) ‘Harmonised maximum clearing price for SIDC’ means the maximum clearing price value, which is applied in all bidding zones which participate in SIDC; and
   b) ‘Harmonised minimum clearing price for SIDC’ means the minimum clearing price value, which is applied in all bidding zones which participate in SIDC.
   c) ‘Transition period’ refers to the duration between the day during which the triggering conditions to adjust the harmonised maximum or the harmonised minimum clearing price described in Article 4(1)(a) and 4(2)(a) have been met and the day of the application of the adjusted harmonised maximum or the harmonised minimum clearing price in all coupled bidding zones which participate in SIDC.
   b) ‘Transition period’ refers to the duration between the day during which the triggering
conditions to adjust the harmonised maximum or minimum clearing prices described in Article 4(1)(a) and 4(2)(a) have been met and the day of the application of the adjusted harmonised maximum or harmonised minimum clearing prices in all coupled bidding zones which participate in SDAC.

3. In this document, unless the context requires otherwise:
   c) the singular indicates the plural and vice versa;
   d) the table of contents, headings and examples are inserted for convenience only and do not affect the interpretation of this document; and
   e) any reference to legislation, regulations, directives, decisions, orders, instruments, codes or any other enactment shall include any modification, extension or re-enactment of it then in force.

TITLE 2

MAXIMUM AND MINIMUM PRICES

Article 3: Reference harmonised maximum and minimum clearing prices for SIDC

1. The reference harmonised maximum clearing price for SIDC, both the continuous trading sessions and the intraday auctions, shall be +9999 EUR/MWh.

2. The reference harmonised minimum clearing price for SIDC, both the continuous trading sessions and the intraday auctions, shall be -9999 EUR/MWh.

3. The reference harmonised maximum and minimum clearing prices for SIDC determined in paragraphs (1) and (2) of this Article shall set the initial value of the harmonised maximum and minimum clearing prices. Thereafter, the harmonised maximum and minimum clearing prices shall be adjusted in accordance with Article 4.

At the implementation of the HMMCP for SIDC, the harmonised maximum and minimum clearing prices for SDAC shall take as initial value the reference harmonised maximum and minimum clearing prices determined in paragraphs (1) and (2) of this Article. Thereafter, the reference harmonised maximum and the reference minimum clearing price shall be adjusted in accordance with Article 4.

Article 4: Criteria and process for adjusting the harmonised establishing and amending maximum and minimum clearing prices for SIDC

1. The harmonised maximum clearing price for SIDC shall be adjusted according to the following rules:
   a) the harmonised maximum clearing price for SIDC shall be increased by 500 EUR/MWh in the event that the clearing price of an intraday auction, in at least one bidding zone, exceeds a value of 70 percent of the harmonised maximum clearing price for SIDC in at least 2 market time units in at least 2 different days within 30 rolling days from the first price spike.
b) after the event referred to in subparagraph (a) occurred, the transition period shall be set to 28 days following the completion of the event;

c) during the transition period mentioned in subparagraph (b), the clearing price shall be kept at the value of the harmonised maximum clearing price for SIDC before the adjustment and all events referred to in paragraph (a) occurred during the transition period shall be ignored;

d) the bidding zones referred to in subparagraph (a) shall be only those bidding zones with cleared buy and sell volumes and those part of the fully coupled SIDC, excluding virtual zones and uncoupled bidding zones.

2. The harmonised minimum clearing price for SIDC, shall be adjusted according to the following rules:

a) the harmonised minimum clearing price for SIDC shall be decreased by 100 EUR/MWh in the event that while not being in a transition period, the clearing price of an intraday auction, in at least one bidding zone, falls below a value of 70 percent of the harmonised minimum clearing price for SIDC in at least 2 market time units in at least 2 different days within 30 rolling days from the first low price;

b) after the event referred to in subparagraph (a) occurred, the transition period shall be set to 28 days following the completion of the event;

c) during the transition period mentioned in subparagraph (b), the clearing price shall be kept at the value of the harmonised minimum clearing price for SIDC before the amendment and all events referred to in paragraph (a) occurred during the transition period shall be ignored;

d) the bidding zones referred to in subparagraph (a) shall be only those bidding zones with cleared buy and sell volumes and those part of the fully coupled SIDC, excluding virtual zones and uncoupled bidding zones.

The harmonised maximum clearing price for SIDC shall be adjusted according to the following rules:

the harmonised maximum clearing price for SIDC shall be increased by 500 EUR/MWh in the event that the clearing price of an intraday auction, in at least one bidding zone, falls below a value of 70 percent of the harmonised maximum clearing price for SIDC in 2 market time units in at least 2 different trading days within 30 rolling days from the first price spike;

after the event referred to in subparagraph (a) occurred, the transition period shall be set to 28 days following the completion of the event;

during the transition period mentioned in subparagraph (b), the clearing price shall be capped at the value of the harmonised maximum clearing price for SIDC before the adjustment and no further price limit increase shall be initiated;

the bidding zones referred to in subparagraph (a) shall be only those bidding zones with cleared buy and sell volumes and those part of the SIDC, excluding virtual zones, and uncoupled bidding zones and those part of the fully coupled SDAC, excluding virtual zones, and uncoupled bidding zones.

The harmonised minimum clearing price for SIDC shall be adjusted according to the following rules:

the harmonised minimum clearing price for SIDC shall be decreased by 100 EUR/MWh in the event that the clearing price of an intraday auction, in at least one bidding zone, falls below a value of 70 percent of the harmonised minimum clearing price for SIDC in 2 market time units in at least 2 different trading days within 30 rolling days from the first price spike;

after the event referred to in subparagraph (a) occurred, the transition period shall be set to 28 days following the completion of the event;

during this transition period mentioned in subparagraph (b), the clearing price shall be capped at the value of the harmonised minimum clearing price for SIDC before the adjusted and no further price limit decrease shall be initiated;
the bidding zones referred to in subparagraph (a) shall be only those bidding zones with cleared buy and sell volumes and those part of the SIDC, excluding virtual zones, and uncoupled bidding zones and those part of the fully coupled SDAC, excluding virtual zones, and uncoupled bidding zones.

3. The harmonised maximum clearing price for SIDC shall be adjusted in the event that harmonised maximum clearing price for SDAC is increased above the harmonised maximum clearing price for SIDC pursuant to Article 4 of the Harmonised maximum and minimum clearing prices for single day-ahead coupling in accordance with Article 41(1) of Commission Regulation (EU) 2015/1222 of 24 July 2015 establishing a guideline on capacity allocation and congestion management. In such a case, the harmonised maximum clearing price for SIDC shall also increase to be equal to the harmonised maximum clearing price for SDAC. Any such change shall be implemented and applied at the same time that the harmonised maximum clearing price for SDAC is applied.

4. The harmonised minimum clearing price for SIDC shall be adjusted in the event that harmonised minimum clearing price for SDAC is decreased below the harmonised minimum clearing price for SIDC pursuant to Article 4 of the Harmonised maximum and minimum clearing prices for single day-ahead coupling in accordance with Article 41(1) of Commission Regulation (EU) 2015/1222 of 24 July 2015 establishing a guideline on capacity allocation and congestion management. In such a case, the harmonised minimum clearing price for SIDC shall also decrease to be equal to the harmonised minimum clearing price for SDAC. Any such change shall be implemented and applied at the same time that the harmonised minimum clearing price for SDAC is applied.

5. The NEMOs shall transparently announce and publish the adjusted harmonised maximum and/or minimum clearing price for SIDC at least 21 days before its implementation and application in SIDC. The NEMOs shall, at least every two years, reassess the HMMCP, share this assessment with all market participants and consult it in relevant stakeholder forums organised in accordance with Article 11 of the CACM Regulation. A reassessment may also follow any adjustment in accordance with paragraph 1), if the NEMOs deem it appropriate.

6.**

**TITLE 3**

**FINAL PROVISIONS**

**Article 5: Publication and implementation**

1. The NEMOs shall publish the HMMCP for SIDC methodology without undue delay after its approval by the Agency.

2. The NEMOs shall implement the HMMCP for SIDC methodology in all bidding zones participating in the SIDC immediately after its approval.
Article 6: Language disclaimer

The reference language for the HMMCP for S-IDC methodology shall be English. For the avoidance of doubt, where NEMOs need to translate this HMMCP for S-IDC methodology into the national language(s) of the relevant regulatory authority, in the event of inconsistencies between the English version submitted in accordance with Article 9(6)(i) of the CACM Regulation and any version in another language, the English version prevails. The relevant NEMO(s) shall be obliged to dispel any inconsistencies by providing a revised version of this HMMCP for S-IDC methodology to the relevant national regulatory authorities.

ANNEX I

List of NEMOs subject to the approved requirements for the HMMCP SDAC:

- BSP Regionalna Energetska Borza d.o.o.
- CROPEX Ltd
- EirGrid plc
- EPEX SPOT SE
- GME Spa
- HEnEx SA
- HUPX Zrt.
- Independent Bulgarian Power Exchange (IBEX)
- NORD POOL EUROPEAN MARKET COUPLING OPERATOR AS
- OKTE a.s.
- OMIE S.A.
- OPCOM S.A.
- OTE a.s.
- Towarowa Gielda Energii S.A.
TITLE 2

Maximum and minimum prices

Article 3

Harmonised maximum and minimum clearing prices for SIDC

1. The harmonised maximum clearing price for SIDC, both the continuous trading sessions and the IntraDay auctions, shall be +9999 EUR/MWh.

2. The harmonised minimum clearing price for SIDC, both the continuous trading sessions and the IntraDay auctions, shall be -9999 EUR/MWh.

Article 4

Criteria and process for establishing and amending maximum and minimum price for SIDC

The harmonised maximum clearing price for SIDC in accordance with Article 3(1) shall be amended in the event that harmonised maximum clearing price for SDAC is increased above the harmonised maximum clearing price for SIDC pursuant to Article 4 of the Harmonised maximum and minimum clearing prices for single day-ahead coupling in accordance with Article 4(1) of Commission Regulation (EU) 2015/1222 of 24 July 2015 establishing a guideline on capacity allocation and congestion management. In such a case, the harmonised maximum clearing price for SIDC shall also increase to be equal to the harmonised maximum clearing price for SDAC. Any such change shall be implemented and applied at the same time that the harmonised maximum clearing price for SDAC is applied.

The harmonised minimum clearing price for SIDC in accordance with Article 3(2) shall be amended in the event that harmonised minimum clearing price for SDAC is decreased below the harmonised minimum clearing price for SIDC pursuant to Article 4 of the Harmonised maximum and minimum clearing prices for single day-ahead coupling in accordance with Article 4(1) of Commission Regulation (EU) 2015/1222 of 24 July 2015 establishing a guideline on capacity allocation and congestion management. In such a case, the harmonised minimum clearing price for SIDC shall also decrease to be equal to the harmonised minimum clearing price for SDAC. Any such change shall be implemented and applied at the same time that the harmonised minimum clearing price for SDAC is applied.

1. The NEMOs shall transparently announce and publish the amended harmonised maximum and/or minimum clearing price for SIDC at least four three weeks before its implementation and application in SIDC.

2. The NEMOs shall, at least every two years, reassess the HMMCP, share this assessment with all market participants and consult it in relevant stakeholder forums organised in accordance with Article 11 of the CACM Regulation. A reassessment may also follow any amendment in accordance with paragraph 1 (Error! Reference source not found.), if the NEMOs deem it appropriate.
TITLE 3

Final provisions

Article 5

Timeline for implementation

The NEMOs shall implement the HMMCP for SIDC in all bidding zones participating in the SIDC immediately after the MCO function has been implemented in accordance with Article 7(3) of the CACM Regulation.
Article 6 Language disclaimer

The reference language for the HMMCP for SDAC shall be English. For the avoidance of doubt, where NEMOs need to translate this HMMCP for SDAC into the national language(s) of the relevant regulatory authority, in the event of inconsistencies between the English version submitted in accordance with Article 9(14) of the CACM Regulation and any version in another language, the relevant NEMO(s) shall be obliged to dispel any inconsistencies by providing a revised version of this HMMCP for SDAC to the relevant national regulatory authorities.
