

Corrigendum

of 27 January 2023

to Annex I of Decision No 07/2019 on the all TSOs' proposal for the methodology for coordinating operational security analysis

In Annex I, Article 42(1):

for: 'By 1 January 2023, and then at least every three years, for the functions and tools and relevant information identified in accordance with Title 4, all relevant TSOs and RSCs, shall define data quality management provisions for the data exchanged in this process.'

read: 'By 1 January 2023, and then at least every three years, for the functions and tools and relevant information identified in accordance with Article 40, all relevant TSOs and RSCs, shall define data quality management provisions for the data exchanged in this process.'¹

In Annex I, Article 42(1):

for: 'The provisions shall be developed at least to the same level of detail as the quality monitoring criteria and indicators defined pursuant to Article 2323 of the common grid model methodology adopted in accordance with Article 70 of the SO Regulation.'

read: 'The provisions shall be developed at least to the same level of detail as the quality monitoring criteria and indicators defined pursuant to Article 23 of the common grid model methodology adopted in accordance with Article 70 of the SO Regulation.'²

¹ Article 42(1) of Annex I to Decision No 07/2019 approves Article 41(1) of the all TSOs' proposal for a methodology for coordinating operational security analysis of 10 July 2018, which refers to '*For the functions and tools and relevant information identified in accordance with Article 40, all relevant TSOs, with the support of the RSCs, shall identify whether the data exchanged in this process require a specific data quality management comparable to the one developed in Article 23 of the methodology developed according to Article 70 of SO GL*'. By mistake, Article 42(1) of Annex I refers to Title 4, instead of Article 40. Indeed, Title 4 of Annex I does not regulate the identification of the functions and tools, while Article 40 thereof does.

² By mistake, Article 42(1) of Annex I refers to Article 2323 of the common grid model methodology adopted in accordance with Article 70 of the SO Regulation, instead of Article 23 of that methodology. Indeed, the common grid model methodology adopted in accordance with Article 70 of the SO Regulation and existing at the time of adoption of Annex I does not contain any Article 2323, while it does include an Article 23.
