

PUBLIC NOTICE

ACER-ELE-2025-002

The European Union Agency for the Cooperation of Energy Regulators (ACER) initiates the procedure ref. ACER-ELE-2025-002 to decide on the request for an extension of the deadline for the Baltic national regulatory authorities (NRAs) to adopt the capacity calculation methodology (CCM), in accordance with Article 10 of the [Regulation on forward capacity allocation \(FCA\)](#).

On 20 March 2025, the Polish NRA, URE (Energy Regulatory Office), acting on behalf of the NRAs in the Baltic capacity calculation region (CCR), requested a three-month extension from ACER to approve the common long-term capacity calculation methodology (Baltic LT CCM) for the Baltic CCR. This request was made pursuant to Article 6(10) of [Regulation \(EU\) 2019/942](#).

The Baltic NRAs reported that additional time is needed to assess compatibility of the methodology with day-ahead and intraday methodologies, as required by Article 10(3) of the FCA Regulation. They also stated that they require more time to evaluate proposed allocation constraints and to review updated information regarding the upcoming balancing market reform in Poland.

ACER intends to decide on this request promptly, aiming to reach a decision in May 2025.
