ACER public consultation: Guideline on REMIT transaction reporting

Fields marked with * are mandatory.

Introduction

Background

Regulation (EU) No 1227/2011 on wholesale energy market integrity and transparency ("REMIT") establishes a framework to ensure the integrity and transparency of wholesale energy markets across the Union.

In 2024, REMIT was revised, introducing new and updated data reporting requirements. These changes were further specified in Regulation (EU) No 2026/256 on data reporting (recast REMIT Implementing Regulation), which sets out detailed rules on data reporting obligations, market participant registration, inside information disclosure, and monitoring procedures to ensure consistent enforcement of REMIT across EU wholesale energy markets.

Scope of the Guideline on transaction reporting

The revised REMIT introduced a new possibility for ACER to develop guidelines and recommendations to national regulatory authorities or market participants (Article 16b REMIT).

ACER has developed the Guideline on REMIT Transaction Reporting to facilitate the understanding of the data reporting rules and requirements under REMIT and the REMIT Implementing Regulation. The purpose of the Guideline on REMIT Transaction Reporting is to separate the technical guidance on how to report data to ACER, addressed in ACER's Transaction Reporting User Manual (TRUM), from the more policy-oriented aspects of data reporting, now consolidated into the Guideline on REMIT Transaction Reporting.

You can download the draft Guideline on REMIT transaction reporting here:

DRAFT_Guideline_on_REMIT_Transaction_Reporting.docx

Objective of the consultation

According to the revised REMIT, ACER shall conduct public consultations regarding the guidelines which it issues.

The objective of this consultation is to gather valuable feedback, needs and views from the public to refine the structure and content of the proposed guideline.

The survey is structured in dedicated sections following the chapters of the proposed guideline. Respondents are invited to submit their feedback on each section via the open questions below and/or by uploading documents with revision proposals in the dedicated section at the end of the survey.

Contact and deadline

The contact point for this consultation is: REMIT.Consultations@acer.europa.eu

All respondents are invited to submit their comments by 12 June 2026, 17:00 (CET)

Respondent's data

*** Name and surname**

This information will not be published

[redacted]

*** Email address**

This information will not be published

[redacted]

Name of organisation (if applicable)

CNMC

Type of organisation (if applicable)

Multiple values are accepted

- [ ] Market participant (including association)
- [ ] Organised marketplace (including association)
- [ ] Inside information platform (including association)
- [ ] Transmission system operator (including association)
- [x] National regulatory authority
- [ ] Academia/research institution
- [ ] Other (please specify)

*** Country**

- (•) EU-27
- ( ) Other

Data protection, confidentiality and publication of results

Data protection

ACER will process personal data of the respondents in accordance with Regulation (EU) 2018/1725, taking into account that this processing is necessary for performing ACER's consultation tasks.

More information on data protection is available in ACER's data protection notice and on ACER's website.

ACER will not publish personal data.

* I have read and understood the Data Protection Notice on External Webinars / Online Events and Data Protection Notice on Interactions with Stakeholders.

I confirm

Confidentiality and publication

Following this consultation, ACER will make public:

- the number of responses received
- company names, unless they should be considered as confidential
- all non-confidential responses
- ACER's evaluation of responses. In the evaluation, ACER may link responses to specific respondents or group of respondents.

You may request that the name of your company or any information provided in your response is treated as confidential. To this aim, you need to explicitly indicate below whether your response contains confidential information.

* Do you consent to the publication of the name of the organisation?

- (•) Yes
- ( ) No

* Do you consent to the publication of the provided answers?

Please, note that your answer, without your name and organization, may be shared with the EU institutions and national authorities.

- (•) Yes
- ( ) No

* Does your submission contain confidential information?

Please note that submissions containing confidential information will not be published.

- ( ) Yes
- (•) No

Section I: Introduction and scope

This section covers the following topics:

- Legal framework
- Scope and purpose of the Guideline on REMIT transaction reporting
- Target audience
- Transaction reporting and market monitoring
- ACER contacts

Do you have any comments on the guidance provided in this chapter?

Section II: Reporting obligations

II.1 What to report?

This section covers the following topics:

- Transactions to be reported on a continuous basis
- Transactions to be reported on a periodic basis
- Transactions to be reported at the request of ACER
- Reporting requirements regarding transactions executed via a trade-matching system
- Definition of standard and non-standard contracts
- Distinction between product, contract and transaction for standard contracts
- Lifecycle events
- Back-loading requirement

Do you have any comments on the guidance provided in this chapter?

Subchapter 2.1.1.1, point (29): Referring to PPAs only on this paragraph, under the subchapter of “transactions to be reported on a continuous basis”, may lead to the conclusion that such contracts are always reportable on a continuous basis. However, it is our understanding that a Corporate PPA between a generator and a final consumer with a technical capability to consume 600 GWh/year or more, not concluded on an OMP and where the final consumer is not reselling the energy, would only be reportable on a periodic basis.

Subchapter 2.1.1.2, point (34): There may be a typo, as point (34) refers to Article 3(b)(i), while bullet points are used for Articles 3(b)(ii) and 3(b)(iii) giving the impression that are less significant than Article 3(b)(i).

Subchapter 2.1.1.3, point (39), first bullet point: However, if batteries should be assimilated to consumption units, would this mean that the threshold for periodic reporting should apply (article 4(2) of REMIT IR “transactions relating to the supply or storage of electricity or the supply of natural gas to a single consumption unit with a technical capability to consume 600 GWh/year or more, unless concluded on an OMP, shall be reported every six months…”)?
From a practical perspective, we are aware that batteries currently does not have such a consumption capability, however article 4(2) specifically refers to the “storage of electricity”.
Moreover, what about the case of batteries where the electricity is not always transferred back to the grid, but it can be used for self-consume?

Subchapter 2.1.2.1, point (53), regarding the phrase 'However, final customers with a single consumption unit with a consumption capacity less than 600 GWh/year should report all their REMIT reportable transactions for transportation, storage and derivative contracts as such contracts are not considered ‘contracts for the supply and distribution of electricity, hydrogen or natural gas for the use of final customers’:
Although article 2(4) of REMIT only mentions “supply and distribution of electricity”, considering that recital 8 establishes that storage of electricity should be treated the same as supply of electricity, the only reportable contracts for storage would be those of gas, is it correct?
Moreover, what about the case of batteries where the electricity is not always transferred back to the grid, but it can be used for self-consume?
Furthermore, it should be clarified that under “derivatives” we are referring to both categories established in article 3(a)(ii) and 3(b)(iii). By the way the Regulation is structured, it may lead to the conclusion that the derivatives mentioned in 3(a)(ii) are supply contracts themselves.

Subchapter 2.1.5, point (87), regarding the sentence "Moreover, if the broker is only a person professionally arranging transactions (PPAT) and not an OMP, then the contract should also not be considered a standard contract.": Shouldn’t we include here a footnote/reference about where to find further information on this (Section 2.2.1.2 of this Guideline)?

II.2 Who shall report?

This section covers the following topics:

- Reporting parties
- Who shall report transactions concluded on an organised marketplace
- Who shall report transactions concluded outside an organised marketplace
- Who shall report transportation transactions
- Who shall report storage transactions
- Who shall report lifecycle events
- Wholesale energy products already reported in accordance with MiFIR or EMIR

Do you have any comments on the guidance provided in this chapter?

Section III: Start of reporting and reporting frequency

This section covers the following topics:

- Start of reporting
- Frequency of reporting

Do you have any comments on the guidance provided in this chapter?

Other comments and file upload

Are there any other proposals you would like to share with ACER? (e.g. topics that should be covered, amendments etc.)

You can upload your proposals in Word or PDF here.

Please ensure that all your proposed amendments are in one document, clearly identifying each section affected. Track changed versions of the document are also welcome.

Maximum file size is 1 MB. If your file is larger, please use the functional mailbox: REMIT.Consultations@acer.europa.eu

Thank you for your contribution.
