ACER public consultation: Guideline on REMIT transaction reporting

Fields marked with * are mandatory.

Introduction

Background

Regulation (EU) No 1227/2011 on wholesale energy market integrity and transparency ("REMIT") establishes a framework to ensure the integrity and transparency of wholesale energy markets across the Union.

In 2024, REMIT was revised, introducing new and updated data reporting requirements. These changes were further specified in Regulation (EU) No 2026/256 on data reporting (recast REMIT Implementing Regulation), which sets out detailed rules on data reporting obligations, market participant registration, inside information disclosure, and monitoring procedures to ensure consistent enforcement of REMIT across EU wholesale energy markets.

Scope of the Guideline on transaction reporting

The revised REMIT introduced a new possibility for ACER to develop guidelines and recommendations to national regulatory authorities or market participants (Article 16b REMIT).

ACER has developed the Guideline on REMIT Transaction Reporting to facilitate the understanding of the data reporting rules and requirements under REMIT and the REMIT Implementing Regulation. The purpose of the Guideline on REMIT Transaction Reporting is to separate the technical guidance on how to report data to ACER, addressed in ACER's Transaction Reporting User Manual (TRUM), from the more policy-oriented aspects of data reporting, now consolidated into the Guideline on REMIT Transaction Reporting.

You can download the draft Guideline on REMIT transaction reporting here:

DRAFT_Guideline_on_REMIT_Transaction_Reporting.docx

Objective of the consultation

According to the revised REMIT, ACER shall conduct public consultations regarding the guidelines which it issues.

The objective of this consultation is to gather valuable feedback, needs and views from the public to refine the structure and content of the proposed guideline.

The survey is structured in dedicated sections following the chapters of the proposed guideline. Respondents are invited to submit their feedback on each section via the open questions below and/or by uploading documents with revision proposals in the dedicated section at the end of the survey.

Contact and deadline

The contact point for this consultation is: REMIT.Consultations@acer.europa.eu

All respondents are invited to submit their comments by 12 June 2026, 17:00 (CET)

Respondent's data

*** Name and surname**

This information will not be published

[redacted]

*** Email address**

This information will not be published

[redacted]

Name of organisation (if applicable)

Elettricità Futura

Type of organisation (if applicable)

Multiple values are accepted

- [x] Market participant (including association)
- [ ] Organised marketplace (including association)
- [ ] Inside information platform (including association)
- [ ] Transmission system operator (including association)
- [ ] National regulatory authority
- [ ] Academia/research institution
- [ ] Other (please specify)

*** Country**

- (•) EU-27
- ( ) Other

Data protection, confidentiality and publication of results

Data protection

ACER will process personal data of the respondents in accordance with Regulation (EU) 2018/1725, taking into account that this processing is necessary for performing ACER's consultation tasks.

More information on data protection is available in ACER's data protection notice and on ACER's website.

ACER will not publish personal data.

* I have read and understood the Data Protection Notice on External Webinars / Online Events and Data Protection Notice on Interactions with Stakeholders.

I confirm

Confidentiality and publication

Following this consultation, ACER will make public:

- the number of responses received
- company names, unless they should be considered as confidential
- all non-confidential responses
- ACER's evaluation of responses. In the evaluation, ACER may link responses to specific respondents or group of respondents.

You may request that the name of your company or any information provided in your response is treated as confidential. To this aim, you need to explicitly indicate below whether your response contains confidential information.

* Do you consent to the publication of the name of the organisation?

- (•) Yes
- ( ) No

* Do you consent to the publication of the provided answers?

Please, note that your answer, without your name and organization, may be shared with the EU institutions and national authorities.

- (•) Yes
- ( ) No

* Does your submission contain confidential information?

Please note that submissions containing confidential information will not be published.

- ( ) Yes
- (•) No

Section I: Introduction and scope

This section covers the following topics:

- Legal framework
- Scope and purpose of the Guideline on REMIT transaction reporting
- Target audience
- Transaction reporting and market monitoring
- ACER contacts

Do you have any comments on the guidance provided in this chapter?

We appreciate the chance to contribute to the consultation on the proposed amendments and clarifications to the REMIT reporting framework. We share the goal of strengthening transparency and consistency in transaction reporting. Nevertheless, we believe it is crucial that the framework continues to reflect the fundamental REMIT principles of proportionality, legal certainty, and role-based reporting obligations. In a number of areas, the current wording risks giving rise to ambiguity, divergent interpretation, or an unintended broadening of reporting obligations. We therefore urge that clarity and consistency be improved, that alignment with established REMIT principles be maintained, and that disproportionate administrative burdens be avoided where no corresponding benefit to market integrity can be identified.
A consistent and well-defined scope is crucial for ensuring effective implementation. In this respect, the Guideline would benefit from a clearer articulation of what constitutes a reportable transaction, especially where contractual arrangements are primarily linked to physical consumption rather than market trading.
In particular, arrangements related to transportation or storage capacity held by final consumers should not be considered reportable where they remain intrinsically linked to consumption and do not involve wholesale trading behaviour. Extending reporting requirements to such arrangements would create inconsistencies, whereby the principal supply contract remains outside the reporting perimeter while ancillary operational contracts become reportable.
More broadly, greater emphasis should be placed on the distinction between “product”, “contract” and “transaction” as reporting concepts, as well as on the differentiation between a “wholesale energy product” under REMIT and the technical notion of “product” used for reporting purposes. Clarifying these concepts would significantly improve consistency of interpretation.

Section II: Reporting obligations

II.1 What to report?

This section covers the following topics:

- Transactions to be reported on a continuous basis
- Transactions to be reported on a periodic basis
- Transactions to be reported at the request of ACER
- Reporting requirements regarding transactions executed via a trade-matching system
- Definition of standard and non-standard contracts
- Distinction between product, contract and transaction for standard contracts
- Lifecycle events
- Back-loading requirement

Do you have any comments on the guidance provided in this chapter?

Our comment exceeds the character limit for this answer, therefore we placed it in the attached file (Section II_Reporting Obligations_Elettricità Futura comments.pdf)

II.2 Who shall report?

This section covers the following topics:

- Reporting parties
- Who shall report transactions concluded on an organised marketplace
- Who shall report transactions concluded outside an organised marketplace
- Who shall report transportation transactions
- Who shall report storage transactions
- Who shall report lifecycle events
- Wholesale energy products already reported in accordance with MiFIR or EMIR

Do you have any comments on the guidance provided in this chapter?

Reporting Parties (2.2.1):
Since the entry into force of REMIT II order book reporting, market participants have encountered growing difficulties in accessing the data they need from OMPs, as the rules governing data sharing by OMPs with market participants and their RRMs remain inadequately defined. While we do not share ACER's view that MPs retain liability for checking data submitted by OMPs to ACER, the absence of a clear data sharing framework is particularly problematic given that market participants continue to bear additional obligations in relation to OMP-reported data, including Exposure reporting and STOR obligations, which are becoming increasingly difficult to fulfil without adequate access to the underlying data. We therefore call on ACER to establish explicitly that OMPs are obliged to share relevant data with market participants and, where requested, with their RRMs, without placing any further administrative burden on market participants in this regard.

Organised Market Places (2.2.1.2):
- The broadened definition of OMP under REMIT II, combined with persisting uncertainties around primary capacity allocations and balancing energy reporting, makes it progressively harder for market participants to assess whether a given platform, TSO or SSO qualifies as an OMP, creating a tangible risk of inconsistent reporting practices across the market. We call on ACER to confirm unambiguously that primary capacity allocations and balancing energy transactions are to be reported by TSOs, SSOs or OMPs acting on their behalf, and that no corresponding obligations fall on MPs in this respect.
- On point 162, we welcome the clarification set out in this paragraph and consider that the principle it articulates should be carried through consistently across the entire text. We reiterate our request for ACER to enshrine a clear rule to the effect that auction and transaction data relating to primary capacity mechanisms — whether involving TSOs or SSOs — as well as balancing energy transactions concluded with TSOs, are to be reported directly to ACER by the relevant OMP, TSO or SSO.

Who shall report transportation transactions (2.2.4.):
- On point 186, we are supportive of the wording put forward by the Agency, though the lack of clarity on the definition of OMP remains an outstanding concern.
- On point 191, we welcome the recognition of single-sided reporting for secondary capacity allocations and note that this principle could, in our view, be extended more broadly across the REMIT reporting framework. At

the same time, further practical guidance would be needed on how single-sided reporting should operate in the context of OTC transactions — in particular, which counterparty, whether buyer or seller, bears the reporting obligation where the transaction has not been submitted through a capacity platform

Section III: Start of reporting and reporting frequency

This section covers the following topics:

- Start of reporting
- Frequency of reporting

Do you have any comments on the guidance provided in this chapter?

Other comments and file upload

Are there any other proposals you would like to share with ACER? (e.g. topics that should be covered, amendments etc.)

You can upload your proposals in Word or PDF here.

Please ensure that all your proposed amendments are in one document, clearly identifying each section affected. Track changed versions of the document are also welcome.

Maximum file size is 1 MB. If your file is larger, please use the functional mailbox: REMIT. Consultations@acer.europa.eu
