ACER public consultation: Guideline on REMIT transaction reporting

Fields marked with * are mandatory.

Introduction

Background

Regulation (EU) No 1227/2011 on wholesale energy market integrity and transparency ("REMIT") establishes a framework to ensure the integrity and transparency of wholesale energy markets across the Union.

In 2024, REMIT was revised, introducing new and updated data reporting requirements. These changes were further specified in Regulation (EU) No 2026/256 on data reporting (recast REMIT Implementing Regulation), which sets out detailed rules on data reporting obligations, market participant registration, inside information disclosure, and monitoring procedures to ensure consistent enforcement of REMIT across EU wholesale energy markets.

Scope of the Guideline on transaction reporting

The revised REMIT introduced a new possibility for ACER to develop guidelines and recommendations to national regulatory authorities or market participants (Article 16b REMIT).

ACER has developed the Guideline on REMIT Transaction Reporting to facilitate the understanding of the data reporting rules and requirements under REMIT and the REMIT Implementing Regulation. The purpose of the Guideline on REMIT Transaction Reporting is to separate the technical guidance on how to report data to ACER, addressed in ACER's Transaction Reporting User Manual (TRUM), from the more policy-oriented aspects of data reporting, now consolidated into the Guideline on REMIT Transaction Reporting.

You can download the draft Guideline on REMIT transaction reporting here:

DRAFT_Guideline_on_REMIT_Transaction_Reporting.docx

Objective of the consultation

According to the revised REMIT, ACER shall conduct public consultations regarding the guidelines which it issues.

The objective of this consultation is to gather valuable feedback, needs and views from the public to refine the structure and content of the proposed guideline.

The survey is structured in dedicated sections following the chapters of the proposed guideline. Respondents are invited to submit their feedback on each section via the open questions below and/or by uploading documents with revision proposals in the dedicated section at the end of the survey.

Contact and deadline

The contact point for this consultation is: REMIT.Consultations@acer.europa.eu

All respondents are invited to submit their comments by 12 June 2026, 17:00 (CET)

Respondent's data

*** Name and surname**

This information will not be published

[redacted]

*** Email address**

This information will not be published

[redacted]

Name of organisation (if applicable)

Galp Energia

Type of organisation (if applicable)

Multiple values are accepted

- [x] Market participant (including association)
- [ ] Organised marketplace (including association)
- [ ] Inside information platform (including association)
- [ ] Transmission system operator (including association)
- [ ] National regulatory authority
- [ ] Academia/research institution
- [ ] Other (please specify)

*** Country**

- (•) EU-27
- ( ) Other

Data protection, confidentiality and publication of results

Data protection

ACER will process personal data of the respondents in accordance with Regulation (EU) 2018/1725, taking into account that this processing is necessary for performing ACER's consultation tasks.

More information on data protection is available in ACER's data protection notice and on ACER's website.

ACER will not publish personal data.

* I have read and understood the Data Protection Notice on External Webinars / Online Events and Data Protection Notice on Interactions with Stakeholders.

I confirm

Confidentiality and publication

Following this consultation, ACER will make public:

- the number of responses received
- company names, unless they should be considered as confidential
- all non-confidential responses
- ACER's evaluation of responses. In the evaluation, ACER may link responses to specific respondents or group of respondents.

You may request that the name of your company or any information provided in your response is treated as confidential. To this aim, you need to explicitly indicate below whether your response contains confidential information.

* Do you consent to the publication of the name of the organisation?

- (•) Yes
- ( ) No

* Do you consent to the publication of the provided answers?

Please, note that your answer, without your name and organization, may be shared with the EU institutions and national authorities.

- (•) Yes
- ( ) No

* Does your submission contain confidential information?

Please note that submissions containing confidential information will not be published.

- ( ) Yes
- (•) No

Section I: Introduction and scope

This section covers the following topics:

- Legal framework
- Scope and purpose of the Guideline on REMIT transaction reporting
- Target audience
- Transaction reporting and market monitoring
- ACER contacts

Do you have any comments on the guidance provided in this chapter?

• The document claims that there will be separate documents for Exposure Reporting, Fundamental Data, Inside Information and the Manual of Procedures. I believe it might be beneficial to have a single document that can be used as a point of reference for the different kinds of reporting in order not to spread out the information.
• There is no mention to a separate document for LNG Market data, but this document does not cover the reporting timings for this kind of reporting. Should it then be assumed that the timings are the same as with continuous reporting?

Section II: Reporting obligations

II.1 What to report?

This section covers the following topics:

- Transactions to be reported on a continuous basis
- Transactions to be reported on a periodic basis
- Transactions to be reported at the request of ACER
- Reporting requirements regarding transactions executed via a trade-matching system
- Definition of standard and non-standard contracts
- Distinction between product, contract and transaction for standard contracts
- Lifecycle events
- Back-loading requirement

Do you have any comments on the guidance provided in this chapter?

• There are several instances where the document refers to the TRUM, which is yet to be published. It is more complicated to do a full analysis not having the document available.
• PPAs are within the scope of REMIT, VPPAs are being reported for EMIR. The wording on the document is not clear regarding the double reporting obligations
• Regarding the reporting of transactions relating to the supply or storage of electricity or the supply of natural gas to a single consumption unit with a technical capability to consume 600 GWh/year or more ('energy intensive consumer'), unless concluded on an OMP. This information needs to come from the final costumer. Do the suppliers need to ask for the information to all final costumers? Should we rely on the information provided or is there any validation that is expected? Does this information needs to be stored for a certain period of time?
• "ACER highlights that additional services that does not by themselves constitute a transaction in wholesale energy products are not reportable transactions under REMIT" Can you provide specific clarification on the Route to Market contracts? Under which scenarios should those Power contracts be reportable?

II.2 Who shall report?

This section covers the following topics:

- Reporting parties
- Who shall report transactions concluded on an organised marketplace
- Who shall report transactions concluded outside an organised marketplace
- Who shall report transportation transactions
- Who shall report storage transactions
- Who shall report lifecycle events
- Wholesale energy products already reported in accordance with MiFIR or EMIR

Do you have any comments on the guidance provided in this chapter?

- The transactions taking place on an OMP are being reported by the OMP. We understand that no additional verifications are required from the Market Participant; however, if any are deemed necessary, they should be explicitly specified. Due to the volume of the transactions, including the order books, it would mean heavy resources would need to be allocated for that validation.
- Regarding some of the new reporting obligations it is not clear who needs to report (OMP, TSO, MP, etc..). On who falls the obligation to report Transactions relating to capacity mechanisms? On who falls the obligation to report Transactions relating to balancing services?
- In the event of deconsolidation from the group, the outstanding transactions with other members of the group should be reported in T+10 days from the deconsolidation date. In the event of long term contracts that already had executions taking place, it should provide more clarity on what to do on those scenarios.
- Is it expected for LNG market participants to still submit bids and offers via RRMs to ARIS? It represents a significant constraint given that most ETRM systems do not incorporate bids and offers but only transactions.
- Are TSOs expected to be considered an OMP in the event that they offer balancing services and capacity allocation as per article 162?
- Does ACER intend to provide the full list of OMPs for MPs visibility?

Section III: Start of reporting and reporting frequency

This section covers the following topics:

- Start of reporting
- Frequency of reporting

Do you have any comments on the guidance provided in this chapter?

- The time constraints are significant since the starting date of the application of exposure reporting is less than 3 months after the expected date of the TRUM. Even if the reporting starts at a later date, without the full visibility on what is expected from the MPs we cannot know what to setup on January for that monitoring to start taking place.
- What would be the expected reporting timelines for the LNG Market data information?

Other comments and file upload

Are there any other proposals you would like to share with ACER? (e.g. topics that should be covered, amendments etc.)

No

You can upload your proposals in Word or PDF here.

Please ensure that all your proposed amendments are in one document, clearly identifying each section affected. Track changed versions of the document are also welcome.

Maximum file size is 1 MB. If your file is larger, please use the functional mailbox: REMIT.Consultations@acer.europa.eu

Thank you for your contribution.
