Box 1: Questions related to the proposed schemas.

1. Would you add any other field not included in the current proposal? If so, please explain your reasoning.

No, we would not.

2. Would you remove any field represented in the current proposal? If so, please explain your reasoning.

No, we would not.

3. Would you change any of the descriptions, accepted values or applicability? If so, please explain your reasoning. Are the schemas or values that you are suggesting based on any industry standard? Which one(s)

Our proposal of change:

14. Decision Time (gas and electricity capacity and ‘other’).

As we understand the decision time is the moment we decide to change plans. Those decisions are often made by the Board whose meetings last for several hours, therefore it is not possible to publish the information in one hour. Decisions of the Board may include renovation plans and could be taken a year ahead. We think it is not necessary to publish such informations in an hour.

In that case we propose to extend the time of publication to twenty-four hours from the decision which is analogous to information obligation of companies whose securities are admitted to trading on developed capital markets in the European Union. The regulations in this area are compatible with EU rules, especially the Transparency Directive and the Market Abuse Directive.

Box 2: Question related to the implementation of web feeds.

4. Do you agree with the use of RSS or ATOM feeds to fulfil the requirement under Article 10(1) of the REMIT Implementing Regulation?

Yes, we agree.
