

## TC\_2023\_E\_01 - Targeted consultation on draft amendments to ENTSO-E's association documents

### Consultation questions

The regulatory framework applicable to ENTSO-E and its member TSOs is laid down in the Union law, namely in the Electricity Regulation ([Regulation \(EU\) 2019/943](#)) and the Electricity Directive ([Directive \(EU\) 2019/944](#)). ENTSO-E's association documents must comply with the Union law.

In particular, according to Recital (42) of the Electricity Regulation, ENTSO-E's tasks should be well-defined and its working method should ensure efficiency and transparency. Articles 28 to 34 of the Regulation govern ENTSO-E's establishment, mission, tasks, costs and its consultation duties. Articles 58 to 61 of the Regulation set out the process for adopting and amending network codes and guidelines.

Further rules applicable to transmission system operators, such as their tasks, unbundling, designation and certification provisions, are laid down in Chapter V and VI of the Electricity Directive.

#### **Question 1**

In your view, are the proposed amendments to ENTSO-E's Articles of Association in line with the applicable Union law?

#### **Question 2**

In your view, are the proposed amendments to ENTSO-E's Internal Regulations in line with the applicable Union law?

#### **Question 3**

In your view, is the proposed NC development process in line with the applicable Union law?

#### **Question 4**
