Communication of the Agency on the implementation of the Network Code on Harmonised Transmission Tariff Structures for Gas in Austria

Following the consultation launched by E-Control on 31 January 2019 pursuant to Article 26 of the Network Code on Harmonised Transmission Tariff Structure for Gas (“NC TAR”), the Agency for the Cooperation of Energy Regulators (‘the Agency’) communicates that it will not publish a Report containing its analysis based on Article 27(2) of the NC TAR.

As clarified by the National Regulatory Authority the consultation will not be followed by a motivated decision, as is required of the final consultation by Article 27(4) of the NC TAR. For this reason, the consultation carried out by E-Control cannot be considered as final. E-Control will clarify these details shortly on its website ([link](#)).

The Agency will issue the Report analysing the final consultation once it is launched and following the precepts laid out in Article 27(2) of the NC TAR. According to the information provided by E-Control, the final consultation will be carried out in Q4 2019.

The Agency notes that Austria will miss the deadline of 31 May 2019, established in Article 27(5) of the NC TAR, for completing the final consultation on the reference price methodology.
