13rd March 2023

Dear Sirs,

I write on behalf of the concerned National Regulatory Authorities (hereafter “RR NRAs”), regarding the proposal of all transmission system operators (TSOs) performing the reserve replacement process (hereafter “RR TSOs”) for the second amendment of the implementation framework for a European platform for the exchange of balancing energy from replacement reserves (hereafter “RR IF”), in accordance with Article 19(1) of Commission Regulation (EU) 2017/2195 establishing a guideline on electricity balancing. The last RR NRA received the proposal for amendment on 15 November 2022, therefore a decision is required by RR NRAs by 15 May 2023.

The enclosed document, dated 10 March 2023, elaborates an agreement of the RR NRAs to amend and approve the RR IF. This agreement of the RR NRAs shall provide evidence that a decision on the proposals does not need to be adopted by ACER pursuant to Article 5(7) of the EBGL and is intended to constitute the basis on which the RR NRAs will each subsequently approve the proposal.

The RR NRAs have agreed to issue their national decision to approve the RR IF, as amended by themselves, by 15 May 2023.

Yours sincerely,

Stefano Rossi

RR NRAs project leader
