#### 1.1 Our purpose

Our overall purpose is achieving a transition of the European energy system in line with the political objectives set, reaping benefits of increased energy market integration across Europe, and securing low-carbon supply at least possible cost for European businesses and citizens.

The Agency promotes:

In this respect, ACER:

- Complements and coordinates the work of NRAs,
- Participates in the development of European network rules,
- Takes, under certain conditions, binding individual decisions on terms and conditions for access and operational security for cross-border infrastructure, on cross-border cost allocation for Projects of Common Interest and on terms and conditions or methodologies for the implementation of network codes,

- Monitors the internal markets in electricity and natural gas and reports on its findings,
- Monitors trading in wholesale energy products to detect and deter market abuse and ensure the integrity and transparency of EU wholesale energy markets in accordance with REMIT i.e., Regulation (EU) No 1227/2011.

#### 1.2 ACER’s evolving role

ACER is on a significant growth trajectory, marked by an expanding number and array of tasks in the recent years. Our role as a collaborative agency within the framework of the EU’s national energy regulatory authorities remains at the heart of our mission, complimented by a range of tasks that span various aspects of the EU energy system, encompassing monitoring of energy flows, wider system needs, and so much more.

<sup>1</sup> Regulation (EU) No 2019/942 of the European Parliament and of the Council of 05 June 2019 (recast).

ACER is currently at a critical point, playing a key role in advancing EU energy market integration and bolstering market integrity and transparency; efforts that strike us as more crucial than ever. Our goal is to contribute with our capacities, insights, and creativity as an EU energy regulatory agency to a transition of the energy system that is affordable, secure, and decarbonized – a transition that takes place at the pace set by leaders across the EU.

ACER has been entrusted with additional responsibilities under the "Clean Energy for all Europeans" legislative package, and is expecting new legislative packages to be adopted, focusing on key areas such as Gas Decarbonisation, REMIT reform, and Electricity Market Design, aiming to bring transformative changes and further evolving the European energy landscape.

Our organisational structure underwent a transformation to enhance our efficiency and effectiveness and to prepare us to deliver on a number of new tasks accorded to us in the aforementioned major legislative packages agreed towards the end of 2023. Our new organisational structure now comprises seven Departments: Coordination, Cooperation and Legal; Electricity; Energy System Needs; Gas Hydrogen and Retail; Market Information and Transparency; Market Surveillance and Conduct; REMIT Investigations.
