In this respect, ACER:

- Monitors the internal markets in electricity and natural gas and reports on its findings,

1.2 ACER's evolving role

ACER is on a significant growth trajectory, marked by an expanding number and array of tasks in the recent years. Our role as a collaborative agency within the framework of the EU's NRAs remains at the heart of our mission, complimented by a range of tasks that span various aspects of the EU energy system, encompassing monitoring of energy flows, wider system needs, and so much more.

ACER is currently at a critical point, playing a key role in advancing EU energy market integration and bolstering market integrity and transparency; efforts that strike us as more crucial than ever. Our goal is to contribute with our capacities, insights, and creativity as an EU energy regulatory agency to a transition of the energy system that is affordable, secure, and decarbonised – a transition that takes place at the pace set by leaders across the EU.

ACER has been entrusted with additional responsibilities under the "Clean Energy for all Europeans" legislative package as well as the recently adopted legislative packages focusing on Gas Decarbonisation, REMIT reform, and Electricity Market Design, aiming to bring transformative changes and further evolving the European energy landscape.
