

CWE – technical meeting

23 February 2011 from 10:30 – 16:00

CREG premises, Rue de l'Industrie 26-38, 1040 Brussels

DRAFT MINUTES

Participants		
Guro	Grøtterud	CRE
Mathieu	Fransen	NMa
Pascal	Boucquey	CREG
Patrick	Luickx	CREG
Alain	Marien	CREG
Pieter	Schavemaker	Eurogroup consulting
Manuel	Aguado	RTE (FB WG convenor)
Dietmar	Beck	Amprion

1. Introduction

Welcome to CREG

- Minutes and presentation to circulate in the CWE RI
- No publication of the documents

2. Update on FB project

Basics of FB logic and capacity calculation explained by TSOs.

Report on FB to be expected at least before 21 March (PLEF SG1). Report is finished from a technical point of view, and formal approval is expected on March 11.

Report will explain what has been done since 2008, in a pedagogical way. It will also serve as basis for the FB implementation.

The report will be more detailed than the presentation.

3. Presentation on FB project

Presentation based on crossborder market parties platform (Vienna). This will be the presentation on the FB meeting in Budapest.

50hertz is inside the calculations of CWE FB (and do participate in some meetings).

Concerning capacity calculation, CWE NRAs ask the TSO representatives to show a real case for (1 hour) capacity calculation and allocation

Constraints given to the market will be given to participants. These constraints are the determining ones for the allocated capacity and can change from hour to hour.

The tool to understand FB capacity use by market parties could be provided in advance to the market parties (for testing / getting used to it).

Launch date of FB is postponed to second half 2012. The planning for FB is shared with the PXs. Therefore delays related to PXs (as with ATC launch) should be avoided.
