

ROMANIAN ENERGY REGULATORY AUTHORITY - ANRE

NATIONAL UPDATE – ROMANIA ENTRY-EXIT MODEL AND VTP

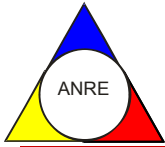

Roxana GHEORGHE

Director of Energy Market Division - ANRE

GRI SSE RCC MEETING

PRAGUE

6th of June 2018

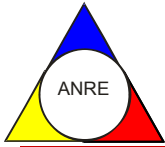

Working Group on Romanian gas market design

"Implementation of EU Gas Market Rules with Focus on Network Codes in the Romanian Gas Market" Workshop, in Bucharest, 8th-9th of June 2017

Workshop **main conclusions**:

- Transgaz to provide a proposal for NC amendment in order to facilitate for the network users the possibility to submit trade notifications without quantity limits on the VTP;
 - With the full implementation of the entry exit model, the access to the VTP will be without any restrictions on any users – **Note**: *The entry exit system containing fully decoupled entry exit contracts with corresponding tariffs **including the DSO level** requires a more complex approach ;*
 - Transgaz to propose to ANRE to change the gas day to 7 to 7 Romanian time in line with the CAM Network Code;
 - ANRE shall set or approve and publish the methodology for the calculation of the neutrality charges, based on Article 30 (2) of the Balancing NC.
-

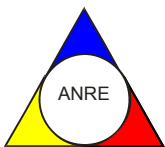

Working Group on Romanian gas market design

September 2017 – within the margin of CESEC Ministerial Meeting, in Bucharest, 27th-28th of September 2017:

- Considering the challenges the market rules implementation/sector reform in Romania is facing – proposal to establish an Working Group on Romanian gas market design, with the aim of:
 - i) defining/agreeing on the detailed the entry-exit regime design (weighing e.g. specificities of the Romanian gas sector versus experiences in other Member States) on which basis and as part of which
 - ii) the specific features of the network codes (e.g. daily balancing) can be introduced into the system.

 - WG participants: DGENER, ACER, ENTSOG, ANRE, TRANSGAZ;

 - WG set up in first half of October 2017;
-

Working Group on Romanian gas market design

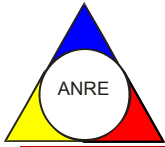

4

✓ ***Established in October 2017, with the participation of:***

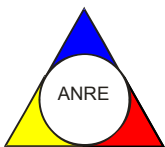

SCOPE:

To check the compliance of current Romanian gas market regulatory framework with the applicable European laws and to establish specific concepts/recommendations for amending the national secondary laws or other applicable regulations.

Working Group on Romanian gas market design
