Implementation

| | |
|--|---------------------------|
| Third-party access rules | Annex I of Reg 715/2009 |
| Congestion management rules | |
| Transparency rules | |
| Capacity allocation rules | Reg 984/2013 |
| Balancing rules | Reg 312/2014 |
| Interoperability & Data exchange | Publication pending |
| Incremental capacity | To be submitted 12/2014 |
| Harmonised Tariff structures | To be submitted 12/2014 |
| Rules for Trading | No FG foreseen |
| Operational procedures in an emergency & settlement rules | Foreseen for Q3/4 of 2015 |
| Remaining areas: Network security and reliability, Energy efficiency, Network connection rules | |

Status of Network Codes so far

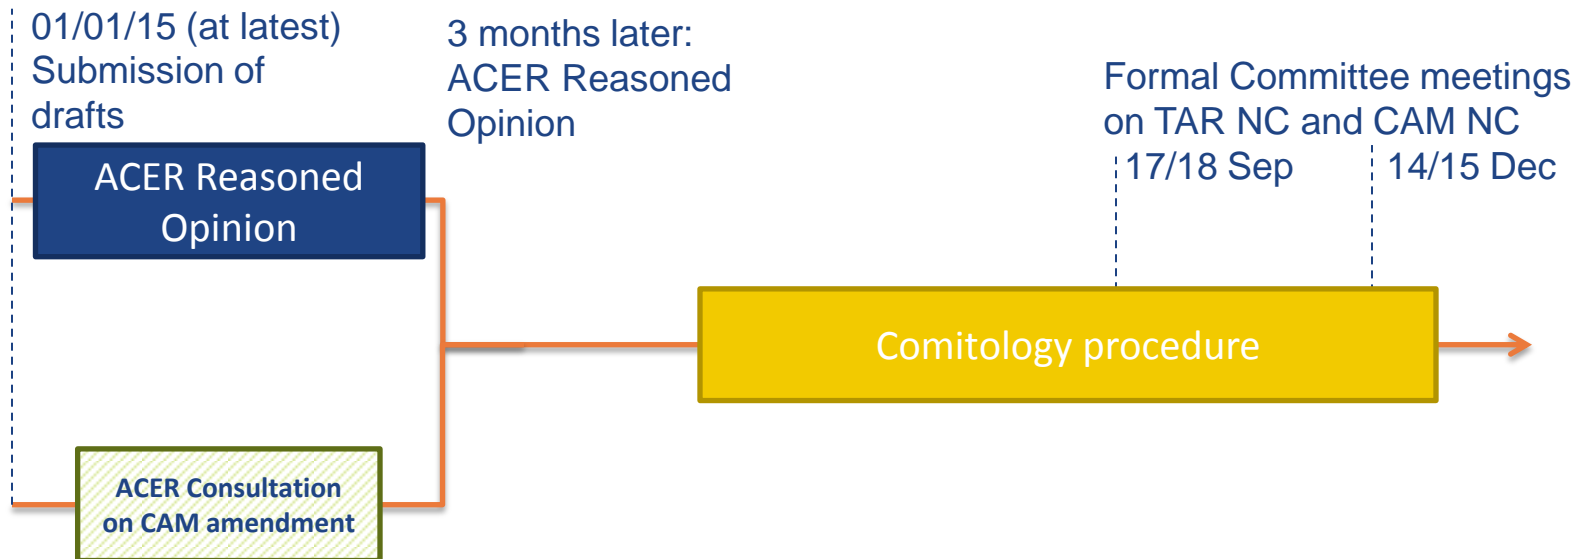

Focus of 2015 and onwards

- 4 Network Codes and 1 Network Code amendment drafted by ENTSOG until end of 2014
- Network Codes are interdependent and will contribute towards to the completion of the internal market in combination
- ENTSOG expects focus on Network Code implementation and monitoring tasks in the upcoming years
- Pilot projects for 'Common Network Operation Tools' have been launched to support the implementation process of Network Codes

TAR NC and CAM NC amendment

- ENTSOG will deliver draft TAR NC and draft amendment to CAM NC to ACER by end of this year

- Parallelism of comitology for TAR NC and CAM NC amendment is crucial due to interdependencies of provisions (especially on Incremental Capacity)

Implementation of CAM NC

CAM NC applicable as of 1 November 2015

- CAM Roadmap to be developed by 2nd/3rd quarter of 2015
 - Three capacity booking platforms already in place or in the process of being established as a part of early implementation work
- Joint EFET/ENTSOG ad-hoc work stream with the aim to identify and resolve potential issues related to the introduction of capacity bundling
- ACER report on progress regarding bundling before 1 Nov 2015
- CNOT development for CAM/CMP requirements

Implementation of BAL NC

no
interim
measures

Time for compliance
to meet 'base case' deadline

Time for compliance
to meet 'extended deadline' (NRA approval)

- full compliance

interim
measures

Year 1

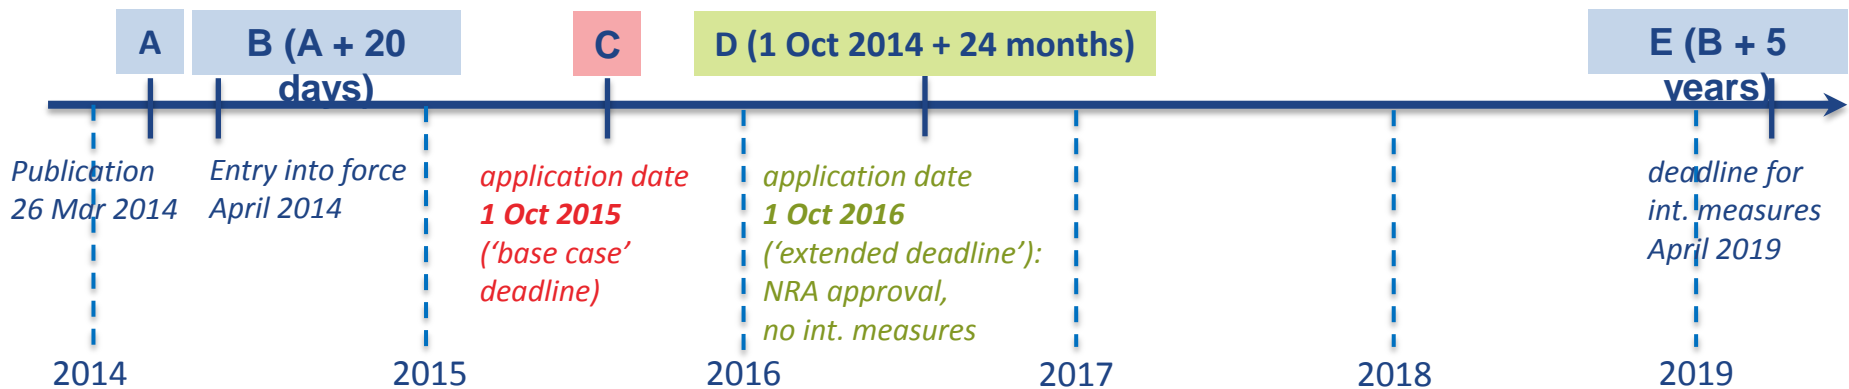

Year 2

Year 3

Year 4

Year 5

- full compliance except for interim measures
- yearly report for interim measures (NRA approval)

Common Network Operation Tools

- Obligation for ENTSOG to establish Common Network Operation Tools ('CNOTs') is defined in Art. 7(3)(a) of Regulation 715/2009
- CNOT translates provisions of Network Codes on cross-border information exchange into clear processes and data format requirements
- Two pilot projects started by ENTSOG: (1) on auction mechanism based on CAM/CMP and (2) on nomination & matching procedures based on BAL/INT
- CNOT on nomination & matching procedures has been published by ENTSOG in February 2014 for public consultation and is currently undergoing another refinement

Nomination and Matching CNOT

**CNOT for Nomination and Matching Processes
is based on interacting provisions of several
network codes**

NC BAL

- Provides rules for the exchange of nominations and re-nominations at IPs
- Entry into force European Commission in April 2014

NC CAM

- Includes obligation to allow single nomination for bundled capacity at IPs (Article 19.7)
- Adopted by the European Commission on 14 October 2013

NC INT

- Provides rules on data exchange between TSOs and NUs at IPs and on the matching process
- Comitology process just ended

Thank You for Your Attention
