

# **GRI SSE**

## **Working plan 2019 - 2020**

# **EU Network Code application on IPs between SSE EU and EnC TSOs**

**Energy Agency of the Republic of Serbia**

**26<sup>th</sup> Stakeholders meeting**  
**GAS REGIONAL INITIATIVE – SOUTH SOUTH –EAST**  
**Prague, November 27, 2019**

# Transmission systems in SSE

# NC on IPs between EU and EnC TSOs

- Reasons for this topic
  - Significant natural gas flow on these IPs, especially from Ukraine
  - Legal gap for NC implementation on IPs between EU and EnC TSOs
  - To compare practice on these IPs during long term transmission contract and after expiration (some will expire soon)
  - To check if rules on new IPs between EU and EnC TSOs will be in line with NC
- Task of the project
  - Basic layer of monitoring
  - Determine actual practise on IPs between SSE EU and EnC TSOs
  - Point to possible difficulties in implementation
  - Make recommendations about necessary steps for NC implementation on IPs between SSE EU and EnC TSOs

# Questionnaire - 1

- Data collection
  - Data collection via questionnaire
  - Information was required from NRA
  - EU - Poland, Slovakia, Hungary, Romania, Bulgaria, Greece, Italy
  - EnC – Ukraine, Moldova, Serbia, North Macedonia, Albania
- Annex I to Regulation 715/2009
  - Transparency - Commission decision 10 November 2010 amending Annex I Chapter 3
  - CMP - Commission decision 24 August 2012 amending Annex I
- NC INT
  - Is IA content in line with NC INT
  - Applicable units and referent conditions
  - Gas quality and odourisation
  - Data exchange – types, data solutions and security measures

# Questionnaire - 2

- NC BAL
  - Nomination, rejection of nomination and re-nomination at IPs
- NC CAM
  - TSOs cooperation
  - Allocation of firm capacity
  - Incremental capacity process
  - Interruptible capacity
- NC TAR
  - The values from cost allocation assessment
  - Level of multipliers and seasonal factors
  - Price formation for bundled capacity and capacity at virtual IPs
  - Clearing price and payable price

# Timelines for the questionnaire and Report

- Timeline for the questionnaire
  - The first version – 19 July 2019 was sent to ACER review
  - The second version was sent to NRA for comments – 15 September 2019
  - The final version was sent to NRA for fulfillment – 8 October 2019
  - Deadline for NRA to collect data from their TSOs and send fulfilled questionnaire was 8 November 2019
  - Only Poland and Serbia sent fulfilled questionnaire until now
  - Appeal to other TSOs and NRA to send fulfilled questionnaire asap
- Timeline for the report
  - The first version – February 2020 will be sent to ACER review
  - The second version will be presented to SH on the GRI SSE meeting – spring 2020
  - The final report about NC implementation on IPs between EU and EnC TSOs – June 2020

# Sources and content of the Report

- Sources for information about NC implementation
  - The questionnaire for practice on IPs between EU and EnC TSOs and
  - ACER reports about practice on IPs between EU TSOs
  - ECRB EnC reports about practice on IPs between EnC TSOs
- Report
  - Practice on IPs between EU TSOs as a base how to implement NC on IPs between EU and EnC TSOs
  - Practice on IPs between EnC TSOs as a check if NC implementation started in EnC
  - Report recommendation for IPs between EU and EnC TSOs
    - maybe in more than one steps implementation on the same IPs
    - the same solutions on both side of IP
    - the same solutions on all IPs in one country, if it is possible

# Possible results from NC implementation

- NC implementation on EU-EnC IPs in EnC TSOs
  - simplified shippers entrance on EnC countries gas markets
  - will help in development of wholesale gas market in EnC countries
  - competition reduces gas price for final customers
  - experience for NC implementation on EnC-EnC IPs
- NC implementation on EU-EnC IPs in EU TSOs
  - positive impact on wholesale gas market in EU countries
  - promotion of regional gas market
