

**ENERGITILSYNET**

Danish Energy Regulatory Authority

# **Transparency Platform for the Danish Gas Market**

by Jeppe Danø

**ENERGITILSYNET**

Danish Energy Regulatory Authority

# **Introduction/background**

- **DERA's analyse of structural problems in the Danish part of the North Sea (2011)**
  - Lack of transparency and asymmetric information
  - Between asset owners in the upstream sector and other participants on the Danish wholesale market for gas
- **REMIT**
  - Disclosure of market price relevant information in an effective and timely manner

# Phase I

- **Establishing a joint web platform**
  - For timely disclosure of market relevant and potentially price influencing information
  - Easy to handle, easy to understand
- **Trustworthy by market actors**
  - Participants: DERA, Energinet.dk (TSO), Nord Pool Gas and Upstream companies (Maersk Oil and Gas, DONG, DONG E&P, Nordsøfonden and Shell partly)
  - Voluntary participation
- The platform went live in October 2012
- For more information: <https://gasmarketmessage.dk/>

ENERGITILSYNET

Danish Energy Regulatory Authority

## Phase II

- **Improve the platform**
  - Market actors evaluate phase I after 6 months, and any amendment of the platform will be incorporated
- **Extend the Upstream Transparency Project to:**
  - Storage
  - Shippers
- **Mandatory platform**
  - DERA expect to make the joint web platform mandatory for the market actors on the Danish wholesale market in 2013

**ENERGINET/DK** Gas Market Messages

**REMIT messages**  
REMIT is the abbreviation of Regulation on Energy Market Integrity and Transparency.  
REMIT messages are information relevant to the capacity and use of facilities for production, storage, consumption or transmission of natural gas.

**General market messages**  
The market participants may also disclose and receive other information of commercial relevance to the market participants in general, eg Energinet.dk's declaration of a supply crisis, information on mergers and acquisitions etc.

**Login or register**  
[Login](#)  
**Four steps before first login:**  
1. Please request a Gas Market Message Agreement by filling in the [request form](#) and forward it by e-mail to [anmodning@energinet.dk](mailto:anmodning@energinet.dk). Energinet.dk will send you the agreement for signature.  
2. Gas market participants may publish and receive REMIT messages after signing [Energinet.dk's Gas Market Message Agreement](#).  
3. New users may register their own user name and contact information.  
4. Energinet.dk will approve all users whose company has a signed [Gas Market Message Agreement](#). Approved users will be able to publish and receive messages. Under 'Links' you will find a [user guide](#) for further information.

New message from Gas Market Messages.

This REMIT message has been prepared by the undersigned. Energinet.dk acts merely as forwarder of the REMIT message, and Energinet.dk assumes no responsibility for any errors, omissions or inaccuracies that may occur in the REMIT message.

Message type:

**New message**

Company:

**Maersk Olie og Gas**

Asset type affected:

**Offshore gas production**

Name of asset affected:

**Tyra East platform/field**

Start time of capacity change:

**29-11-2012**

Ending time of capacity change:

**29-11-2012**

Duration uncertainty:

Causes:

**Maintenance**

Flow capacity reduction:

**46000 MWh/day**

Available flow capacity:

Remarks/additional information

Maersk Oil, on behalf of DUC
