Bundled Hub-to-Hub Product Eynatten

TSO

- Fluxys (Belgium)
- Open Grid Europe (Germany)

IP

- Eynatten

Features

- Firm bundled day-ahead capacity at Eynatten in both flow directions
- First committed first served principle (12:00-16:00)
- Capacity amount varies daily, depending on physical situation in systems
- Capsquare platform is used
- This project does not have specific associated milestones as further developments will be made in the context of the European Capacity Platform Initiative

Use of the Product

- Currently 13 shippers registered
- Bookings and price spread exemplarily shown below for Feb 2012

Progress and lessons learned

- Product available since 15 September 2011
- H2H day-ahead product with highest acceptance
 - Connection of liquid markets (Eynatten connects UK via Zeebrugge with NCG market area)
 - Price spread between Zeebrugge Hub and NCG Hub:
 - ➔ Need for day-ahead product bookings can be seen
- 1 Apr 2012: OGE increases amount of bundled day-ahead capacity by additional offer of unsold long-term capacity

Average offer of bundled capacity

	15 Sep 2011 – 31 Mar 2012	From 01 Apr 2012
Zee→NCG	300 MWh/h	1.500 MWh/h
NCG→Zee	55 MWh/h	1.200 MWh/h
